His Honour the Honourable Pierre Duchesne
Lieutenant-Governor of Québec
Parliament Building
Québec

Your Honour,

I am pleased to present you with the Public Accounts of the Gouvernement du Québec for the fiscal year ended March 31, 2011.

A handwritten signature in black ink, reading "Raymond Bachand". The signature is written in a cursive style with a large, stylized 'R' and 'B'.

Raymond Bachand
Minister of Finance

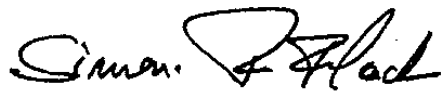

Québec, October 2011

Mr. Raymond Bachand
Minister of Finance
Parliament Building
Québec

Dear Minister,

In accordance with the commission entrusted to me, I have the honour of presenting the Public Accounts of the Gouvernement du Québec for the fiscal year ended March 31, 2011. These accounts have been prepared under section 86 of the *Financial Administration Act* (R.S.Q., c. A-6.001), in accordance with the Government's accounting policies.

Respectfully yours,

A handwritten signature in black ink, reading "Simon-P. Falardeau". The signature is fluid and cursive, with the first name "Simon" written in a smaller, more legible script, and the last name "Falardeau" written in a more stylized, cursive font.

Simon-Pierre Falardeau, CA
Comptroller of Finance

Québec, October 2011

Presentation of the Public Accounts

The 2010-2011 Public Accounts present the financial position of the Gouvernement du Québec and its operations. They include a financial analysis and a glossary to make them easier to understand and thus increase their usefulness and transparency. The analysis presents the changes in the main trends for the major consolidated financial statement items.

The Ministère des Finances is aware that the use of indicators is extremely efficient for observing changes in the state of the Government's finances. Therefore, eleven representative indicators are presented in the section "Analysis of the consolidated financial statements".

Preparing the Public Accounts requires the participation and collaboration of many employees from different government departments, bodies, funds, organizations in the health and social services and education networks as well as government enterprises. We would like to thank all of them for their help in publishing these documents.

Prior to the publication of the Public Accounts, the Ministère des Finances regularly informs the public about the state of the Government's finances and the results of its financial transactions, notably through the *Monthly Report on Financial Transactions*.

The 2010-2011 Public Accounts present information on the actual results for fiscal 2010-2011. The initial forecasts were presented in the 2010-2011 Budget of March 30, 2010 and revised in the December 2, 2010 *Update on Québec's Economic and Financial Situation*. The preliminary results were presented in the 2011-2012 Budget on March 17, 2011. The comparisons that appear in the present publication were made using the results of the initial forecasts in the 2010-2011 Budget, as recommended by the Canadian Institute of Chartered Accountants (CICA).

The Public Accounts for the fiscal year ended March 31, 2011 have been prepared by the Comptroller of Finance for the Minister of Finance in accordance with the accounting policies established by the Conseil du trésor and pursuant to the provisions of section 86 of the *Financial Administration Act* (R.S.Q., c. A-6.001). They are published in two volumes.

Volume 1 – Consolidated financial statements of the Gouvernement du Québec

Volume 1 presents the consolidated financial statements of the Gouvernement du Québec, as well as a financial analysis that allows a better understanding of the transactions carried out in fiscal 2010-2011.

Presentation of the Public Accounts (cond't)

The consolidated financial statements consist of many items:

- A consolidated statement of operations, which presents the annual surplus or deficit arising from operations during the fiscal year. It discloses the Government's revenue, the cost of services and other current expenses.
- A consolidated statement of accumulated deficit, which presents the change in the accumulated deficit taking into consideration the results for the fiscal year, items charged directly to the accumulated deficit and various restatements.
- A consolidated statement of financial position, which presents the financial resources of the Gouvernement du Québec as well as its obligations. It shows the net debt, which consists of the accumulated deficit and non-financial assets.
- A consolidated statement of change in net debt, which presents the combined effect on the net debt of the results for the fiscal year, the change in non-financial assets, items charged directly to the accumulated deficit and restatements.
- A consolidated statement of cash flow, which provides information on the Government's liquid assets generated by or used for operating, equity investment, fixed asset investment and financing activities.
- Notes and appendices, which provide additional information on the items making up the various consolidated statements and which are an integral part of the consolidated financial statements. They also include a summary of the main accounting policies used in preparing the consolidated financial statements, as well as consolidated information on operations and financial position by reporting sector.

The independent auditor's report presents his opinion on the consolidated financial statements.

Volume 2 – Revenue, appropriations, expenditure and investments of the Consolidated Revenue Fund and financial information on the special funds of the Gouvernement du Québec

Volume 2 is divided into three sections. The first two sections report on the operations of entities whose revenue are paid into the Consolidated Revenue Fund or the Health Services Fund as well as entities which operate with funding that is allocated to them by the Parliament of Québec and derived from these two funds. These entities consist of government departments, government budget-funded bodies, the National Assembly and persons designated by it. The third section presents summary financial information on the special funds and the sinking funds.

Glossary

The following terms are used in the sections “Analysis of the consolidated financial statements” and “Consolidated financial statements” contained in this volume.

Accrual basis of accounting

The accrual basis of accounting is an accounting method that involves taking into account, in determining an entity’s net results, the revenues the entity earned and the expenditures it incurred during a fiscal year without considering the moment the transactions were settled through cash receipts or disbursements or in any other manner.

Advance borrowings

Advance borrowings are borrowings made by the Consolidated Revenue Fund in a fiscal year to meet its financial requirements in the next fiscal year.

Budget balance

The term budget balance is defined by the *Balanced Budget Act* (R.S.Q., c. E-12.00001).

The budget balance for a given fiscal year is equal to the difference between revenue and expenditure as determined in conformity with the Government's accounting policies and the following adjustments:

- As prescribed in section 2 of the Act, the budget balance does not include the revenue and expenditure recorded for the Generations Fund and certain retroactive adjustments to revenue from government enterprises.
- The budget balance is determined by also taking into account entries posted directly to the accumulated deficit, except in the case of the following exceptions provided for in section 2.1 of the Act, which result from:
 - i) the retroactive effect of any new Canadian Institute of Chartered Accountants standard for the years preceding the changeover year proposed by the Institute;
 - ii) accounting changes resulting from the 2006-2007 accounting reform appearing in the public accounts.
- The budget balance is increased by any amount needed from the stabilization reserve to maintain a balanced budget.

Glossary (cont'd)

Consolidation methods

Line-by-line consolidation method

The accounts of the Consolidated Revenue Fund and the other entities included in the Government's reporting entity, with the exception of government enterprises, are consolidated line by line in the financial statements. Accordingly, the accounts are harmonized according to the Government's accounting policies and combined line by line; inter-entity transactions and balances are eliminated.

Modified equity method

Investment in government enterprises is accounted for using the modified equity method. According to this method, investments are recorded at cost, which is adjusted annually by the Government's share in the results of these enterprises with an offsetting entry to revenue, and in the other items of their comprehensive income with an offsetting entry to accumulated deficits. The value of the investment is reduced by declared dividends and adjusted by the elimination of unrealized inter-entity gains and losses relating to transactions on assets that remain within the Government's reporting entity. This method requires no harmonization of enterprises' accounting policies with those of the Government.

Consolidated Revenue Fund

The Consolidated Revenue Fund consists of funds collected or received from various sources and over which the Parliament of Québec has a right of allocation. The fund is constituted by the National Assembly, persons designated by it, government departments, and the government budget-funded bodies listed in Schedule 1 of the *Financial Administration Act* (R.S.Q., c. A-6.0001).

Debt representing accumulated deficits

The debt representing accumulated deficits consists of the accumulated deficits presented in the Government's consolidated financial statements, plus the stabilization reserve balance established by the *Balanced Budget Act* (R.S.Q., c. E-12.00001).

Glossary (cont'd)

Derivative instruments

Derivative instruments are instruments whose value fluctuates depending on an underlying instrument, regardless of whether the underlying instrument is actually held or issued.

Financial assets

Financial assets are assets that can be allocated to repaying existing debts or to funding future activities.

Financial instruments

Financial instruments are liquid assets, equity securities in an entity or contracts that are both a source of financial assets for one of the two contracting parties and a source of financial liabilities or equity instruments for the other contracting party.

Generations Fund

Under the *Act to reduce the debt and establish the Generations Fund* (R.S.Q., c. R-2.2.0.1), the Minister of Finance deposits the sums that make up this fund with the Caisse de dépôt et placement du Québec. These sums are used exclusively for repaying the Government's debt.

Government accounting policies

The Government's accounting policies define how it must record financial transactions in its books and adequately report them to the general public. They are adopted by the Conseil du trésor and derive from the Canadian public sector accounting standards.

Gross debt

The gross debt corresponds to the sum of debts before deferred foreign exchange gains or losses and the liability regarding the pension plans and other employee future benefits. The balance of the Generations Fund is subtracted from this amount.

The gross debt for a fiscal year does not include borrowings contracted by the Minister of Finance for the following fiscal year, or the portion of advances made to the Financing Fund established under the *Act respecting the Ministère des Finances* (R.S.Q., c. M-24.01) that is attributable to the funding of bodies not contemplated by the first paragraph of section 89 of the *Financial Administration Act* (R.S.Q., c. A-6.001) and to the funding of the government enterprises listed in Schedule 3 of this Act.

Glossary (cont'd)

Gross domestic product (GDP)

GDP is the value of all goods and services produced within the geographical limits of a country or a territory during a given calendar year.

Indicators

Indicators are tools of measurement that make it possible to monitor and assess the attainment of an objective, the implementation of a strategy or the accomplishment of a task or an activity.

Missions

Missions are the basic activity areas of a government that constitute its *raison d'être*. In Québec, there are six missions: “Health and Social Services”, “Education and Culture”, “Economy and Environment”, “Support for Individuals and Families”, “Administration and Justice”, and “Debt Service”.

Net debt

The net debt corresponds to the difference between the Government’s financial assets and its liabilities. It consists of accumulated deficits and non-financial assets.

Net financial requirements

Net financial requirements are net liquid assets required by the Government for operating, equity investment and fixed asset investment activities.

Non-financial assets

Non-financial assets are assets that normally do not generate cash capable of being used to repay existing debts. They are used for the most part in a sustainable manner to produce goods and deliver services.

Own-source revenue

Own-source revenue consists of revenue from income and property taxes, consumption taxes, duties and permits, miscellaneous sources, government enterprises and the Generations Fund.

Glossary (cont'd)

Reporting entity

The Government's reporting entity encompasses the financial transactions of the National Assembly, persons designated by it, government departments and all of the bodies, funds and enterprises under the Government's control. Control is defined as the power to direct the financial and administrative policies of an entity such that its activities will provide the Government with anticipated benefits or expose it to the risk of loss.

Retirement Plans Sinking Fund (RPSF)

Under the *Financial Administration Act* (R.S.Q., c. A-6.001), the Minister of Finance may make long-term investments by depositing money from the Consolidated Revenue Fund with the Caisse de dépôt et placement du Québec, up to an amount equal to the sums recorded as the pension plans liability, in order to create a sinking fund to provide for the payment of all or part of the benefits awarded under these plans.

Supercategories

Supercategories consist of the categories used to account for expenditures. There are five expenditures supercategories:

- *Debt service*

This supercategory includes interest on the debt, amortization of deferred expenses and of unrealized foreign exchange gains and losses, foreign exchange expenditures and debt management expenses. It also includes interest on the pension plans and other benefits, as well as interest relating to private-public partnership agreements.

- *Doubtful accounts and other allowances*

This supercategory includes expenditures resulting from changes in the allowance for doubtful accounts, the allowance for losses on financial initiatives guaranteed by the Government and the valuation allowance for loans, investments and advances.

- *Operating*

This supercategory includes expenditures or costs incurred in the course of an entity's administrative activities, apart from remuneration expenses, doubtful accounts and other allowances and debt service. It also includes the depreciation of fixed assets.

Glossary (cont'd)**Supercategories** (cont'd)

- *Remuneration*

This supercategory includes operating expenditures incurred for ordinary remuneration, overtime and certain other indemnities paid directly to permanent and part-time employees and to casual employees, such as students and seasonal public sector employees, as well as operating expenditures incurred for the remuneration of health professionals. It also includes benefits and other contributions paid by the Government in its capacity as an employer, such as contributions to the pension plans, the Québec Pension Plan, the Health Services Fund and employment insurance.

- *Transfer*

This supercategory includes expenditures that are paid out to provide beneficiaries with various forms of financial support. These expenditures do not constitute direct acquisitions of goods or services for the Government or funds granted for the purpose of obtaining a return, as in the case of an investment.

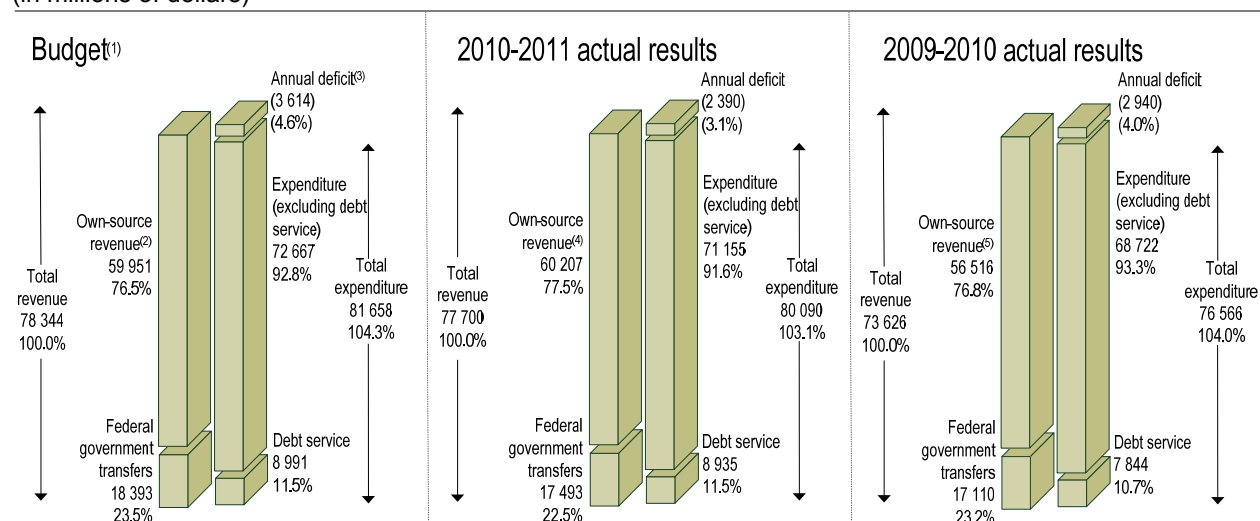

ANALYSIS OF THE FINANCIAL STATEMENTS

1. Highlights for the 2010-2011 fiscal year

Consolidated operations

FISCAL YEAR ENDED MARCH 31, 2011

(in millions of dollars)

For an overview of the data, see the summary of consolidated operations on page 28.

(1) The measures of the plan to restore fiscal balance have been integrated with the 2010-2011 Budget Plan data.

(2) Including \$892 M in Generations Fund revenue.

(3) The anticipated annual deficit includes a \$300 M contingency reserve.

(4) Including \$760 M in Generations Fund revenue.

(5) Including \$725 M in Generations Fund revenue.

- In the 2010-2011 Budget, the Government forecast a budget balance that would be in deficit by \$4 506 million within the meaning of the *Balanced Budget Act*.¹ This budgetary deficit was to take into account:
 - a forecast annual deficit of \$3 614 million;
 - the allocation of \$892 million in revenue to the Generations Fund.
- The results for the current fiscal year show a \$1 356-million improvement over the anticipated budget balance, as well as a budget balance in deficit by \$3 150 million. This balance takes into account:
 - an annual deficit of \$2 390 million, which is \$1 224 million less than forecast;
 - the allocation of \$760 million to the Generations Fund, which is \$132 million less than forecast.

¹ R.S.Q., c. E-12.00001

1. Highlights for the 2010-2011 fiscal year (cont'd)

- Total revenue amounted to \$77 700 million, or \$644 million less than anticipated in the Budget. It was up \$4 074 million relative to fiscal 2009-2010.
 - The differences between the results for the current fiscal year and the 2010-2011 Budget can be explained mainly by a decline in federal government transfer revenue, which stems from the fact that certain investment projects were implemented more slowly than expected. This revenue was deferred and will be recognized when the projects in question are carried out in subsequent years.
 - The differences between the results for the current year and the previous year can be attributed primarily to an increase of 7.1% in revenue from income and property taxes and of 10.0% in revenue from consumption taxes.
- Consolidated expenditure stood at \$80 090 million, or \$1 568 million less than forecast. It grew by \$3 524 million relative to the previous fiscal year.
 - The 2010-2011 Budget forecast a 4.1% increase in consolidated expenditure, whereas a 3.5% increase was recognized.
 - The differences between the results for the current fiscal year and those for the previous fiscal year are due mainly to growth in spending for the “Health and Social Services” and “Education and Culture” missions, since the Government gives them priority, and to the increase in spending for the “Economy and Environment” mission because of the larger transfers granted by the Government for investing in infrastructure in Québec.

2. Overview of the 2010-2011 Budget

The 2010-2011 Budget was the first budget in which the government presented consolidated financial forecasts. Accordingly, the revenue and expenditure of government bodies, special funds and specified purpose accounts were added line by line to those of the Consolidated Revenue Fund.

The 2010-2011 Budget forecast an annual deficit of \$3.6 billion. After the allocation of \$892 million in revenue to the Generations Fund, the anticipated budget balance was in deficit by \$4.5 billion.

Own-source revenue – Consolidated Revenue Fund

The own-source revenue of the Consolidated Revenue Fund, excluding that from government enterprises and that of the Generations Fund, was expected to climb by 6.7%. This increase was attributed essentially to the impact of economic growth.

Consolidated own-source revenue

The 2010-2011 Budget forecast that consolidated own-source revenue, excluding that from government enterprises and that of the Generations Fund, would grow by 6.5%.

Revenue from government enterprises

Revenue from government enterprises was supposed to decline by 2.4% mainly because of a reduction in Hydro-Québec's revenue. However, this reduction was to be partly offset by growth in the revenue of the Société des alcools du Québec and Loto-Québec.

Consolidated federal government transfers

Consolidated federal government transfer revenue was expected to climb by 4.9% in 2010-2011. This growth was to stem mainly from an increase in federal government transfers to specified purpose accounts following the signing of the Canada-Québec agreement on the Building Canada Fund. At the same time, such transfer revenue was forecast to remain fairly stable in the Consolidated Revenue Fund relative to 2009-2010.

Program spending – Consolidated Revenue Fund

The 2010-2011 Budget projected that Consolidated Revenue Fund program spending would rise by 2.6%. The Budget Speech of March 30, 2010 announced an increase of nearly \$1.0 billion in the health budget and the addition of \$316 million to the education budget. For fiscal 2010-2011, the spending forecasts for the Ministère de la Santé et des Services sociaux and the Ministère de l'Éducation, du Loisir et du Sport were \$28.0 billion and \$14.8 billion respectively.

Consolidated spending

The 2010-2011 Budget forecast growth of 4.1% in consolidated spending, excluding debt service.

2. Overview of the 2010-2011 Budget (cont'd)

Debt service

Debt service was expected to climb by 13.4%. This change was attributed essentially to the increase in interest rates, growth in the debt and the impact of the returns of the Caisse de dépôt et placement du Québec on the income of the Retirement Plans Sinking Fund (this income is applied against the interest on the retirement plans account).

Revenue dedicated to the Generations Fund

The 2010-2011 Budget forecast that the revenue of the Generations Fund would reach \$892 million. This revenue, which is recorded in the Government's consolidated financial statements, was applied against the budget balance within the meaning of the *Balanced Budget Act*.

3. Risks and uncertainties

The following factors are elements of risk and uncertainty that are not directly dependent on the Government but that can cause actual results to differ from forecast results:

- the economic forecasts the Government uses to determine its annual budgetary revenue, particularly those concerning changes in economic growth, employment and the Consumer Price Index. For example, a 1.0% difference in nominal GDP has an impact of about \$500 million on the Government's own-source revenue;
- the level of program spending, whose cost is related to the economic situation. For example, changes in the labour market affect the cost of employment assistance and income security programs. Similarly, in the health sector, the aging of the population raises the risk of cost overruns for medication and public services;
- the economic, taxation and population data the Government uses to determine revenue from federal government transfers, as well as the negotiations carried out regularly with the federal government. These data and negotiations can both affect federal government transfer revenue;
- unforeseen situations such as work stoppages, natural catastrophes, etc.;
- fluctuations in interest rates and in the value of the Canadian dollar in relation to other currencies that have an impact on the cost of financing;
- the risk that a financial intermediary will default on its contractual obligations (credit risk);
- certain claims and lawsuits the Government faces, which are presented in Note 12 (p. 114) of the consolidated financial statements.

The consolidated financial statements also set forth in Note 2 (p. 87) the uncertainties to which the estimates needed to prepare these statements are subject.

To reduce its exposure to risk, the Government develops management strategies for some of these variables. With the help of economic, fiscal and budgetary policies, the Government can influence its revenue and expenditure (other than debt service) by:

- using forecasts that reflect the consensus of forecasters;
- monitoring and preparing monthly reports on its budgetary revenue and expenditure;
- implementing economic support measures.

3. Risks and uncertainties (cont'd)

A government cannot prevent a recession single-handedly. However, it has the necessary means to play a stabilizing role in order to offset the effects of an economic slowdown and speed up the recovery.

In addition, financing policies also lead the Government to have an impact on its debt service through various strategies, as described in detail in Note 8 (p. 106, 107) of the consolidated financial statements.

4. Balanced Budget Act

Budget balance

The Gouvernement du Québec has adopted legislation for maintaining a strict budget balance while allowing some flexibility to deal with important events that might affect financial balances.

The 2010-2011 fiscal year ended with a budget balance in deficit by \$3 150 million, taking into account the allocation of \$760 million to the Generations Fund. It is important to note that the budget balance was \$1 356 million less than initially forecast.

The *Balanced Budget Act* stipulates that the Québec government may not incur a budgetary deficit. However, the sections of the Act prohibiting such a deficit do not apply to fiscal 2009-2010 and 2010-2011. For 2011-2012 and 2012-2013, the Government must not post a deficit of over \$3.8 billion and \$1.5 billion respectively. Under the Act, the revenue and expenditure established in accordance with the Government's accounting policies must be balanced for the 2013-2014 fiscal year.

Budget balance

FISCAL YEAR ENDED MARCH 31, 2011
(in millions of dollars)

	2011		2010
	Budget	Actual results as at March 31	Actual results as at March 31
Annual surplus (deficit)	(3 614)	(2 390)	(2 940)
Generations Fund			
Results of the Generations Fund	(892)	(760)	(725)
Stabilization reserve			
Use of the reserve to maintain a balanced budget			433
Accounting changes ⁽¹⁾			58
Budget balance ⁽²⁾	<u>(4 506)</u>	<u>(3 150)</u>	<u>(3 174)</u>

(1) The *Balanced Budget Act* stipulates that the budget balance must:

- exclude the impact of the application of any new accounting standard of the Canadian Institute of Chartered Accountants for a period prior to the changeover date proposed by the Institute;
- take into account the impact of accounting changes, for a period subsequent to March 31, 2006, made directly in the accumulated deficit figures. This rule does not apply to accounting changes resulting from the implementation of the 2006-2007 accounting reform.

(2) The budget balance was established in conformity with the *Balanced Budget Act*.

4. Balanced Budget Act (cont'd)

Generations Fund

In the 2010-2011 Budget, the Government estimated that the revenue of the Generations Fund would be \$892 million. Ultimately, the fund's revenue amounted to \$760 million, or \$132 million less than forecast. This change is due to the fact that water-power royalties and realized investment income were less than anticipated. The fund balance was \$3 437 million as at March 31, 2011.

Revenue

FISCAL YEAR ENDED MARCH 31, 2011
(in millions of dollars)

	2011		2010
	Budget	Actual results as at March 31	Actual results as at March 31
Revenue			
Water-power royalties	687	650	658
Unclaimed property	2	16	7
Investment income			
Revenue (losses) from participation deposits	203	94	60
Total revenue	892	760	725

Change in fund balance

FISCAL YEAR ENDED MARCH 31, 2011
(in millions of dollars)

	2011	2010
Opening balance	2 677	1 952
Revenue	760	725
Closing balance	3 437	2 677

Based on the data presented on pages 155 and 156 of the consolidated financial statements.

4. Balanced Budget Act (cont'd)

Stabilization reserve

A stabilization reserve was created under the *Balanced Budget Act* to facilitate the Government's multi-year budget planning and, subsidiarily, to make it possible to pay sums into the Generations Fund.

The stabilization reserve is earmarked for maintaining a balanced budget; its balance is reduced by the amount required to attain this objective. In addition, the Government may, on the conditions it determines, use the stabilization reserve to pay sums into the Generations Fund. The balance of the reserve is reduced by the amount paid into the fund.

The sums appropriated annually to the stabilization reserve correspond to the surplus recognized for the fiscal year, i.e. the amount of the budget balance that is greater than zero, established in accordance with the provisions of the *Balanced Budget Act*

Stabilization reserve

(1) The measures of the plan to restore fiscal balance have been integrated with the 2010-2011 Budget Plan data.

(2) Certain figures as at March 31, 2010 have been reclassified for consistency with the presentation adopted as at March 31, 2011.

(3) Including school property taxes.

5. Variance analysis (cont'd)

5.1 Comparison of actual results with the Budget

Consolidated revenue

Consolidated revenue for fiscal 2010-2011 was down \$644 million compared with the Budget because of a \$256-million increase in own-source revenue and a \$900-million decrease in federal government transfers.

Own-source revenue

The increase of \$256 million, or 0.4%, compared with the Budget, can be attributed mainly to:

- a \$156-million climb in revenue from income and property taxes, stemming from the fact that the personal income tax revenue of the Consolidated Revenue Fund grew to a greater extent than expected, i.e. by 8.5% compared with the Budget forecast of 6.5%;
- a \$112-million decrease in consumption taxes, resulting in particular from the cancelling out of revenue from the Québec sales tax (QST) paid by organizations in the health and social services and education networks;
- an improvement in revenue from duties and permits attributable primarily to the review of the mining duties system;
- a \$348-million climb in revenue from government enterprises.
 - Although the 2010-2011 Budget forecast a decrease of 2.4% in revenue from government enterprises, such revenue grew by 7.8% compared with the figure forecast. This improvement is essentially the result of an upward revision of the earnings of the Société générale de financement du Québec.
- a decline in Generations Fund revenue.
 - The 2010-2011 Budget forecast that Generations Fund revenue would reach \$892 million. In the end, the fund's revenue reached \$760 million, or \$132 million less than expected, owing to the fact that water-power royalties and realized investment income were lower than forecast.

5. Variance analysis (cont'd)

5.1 Comparison of actual results with the Budget (cont'd)

Consolidated revenue (cont'd)

Consolidated federal government transfers

Federal government transfers were \$900 million lower than forecast in the 2010-2011 Budget. This difference can be explained mainly by:

- a \$413-million decline in the federal government transfer revenue recorded as deferred revenue of the Société de financement des infrastructures locales du Québec, because of the slower-than-anticipated realization of municipal investments funded by this corporation;
- a \$287-million reduction in the federal government transfer revenue of the Ministère des Affaires municipales, des Régions et de l'Occupation du territoire, owing primarily to the postponement of deadlines under agreements related to the Building Canada Fund.

5. Variance analysis (cont'd)

5.1 Comparison of actual results with the Budget (cont'd)

Consolidated expenditure

The downward revision of \$1 512 million, or 2.1%, in expenditure excluding debt service compared with the Budget can be attributed primarily to:

- an \$828-million decrease in transfer expenditures to the “Economy and Environment” mission. This difference can be explained notably by the extension of the deadline for certain projects associated with Canada’s Economic Action Plan from March 31, 2011 to October 31, 2011. Therefore, these projects will be completed in fiscal 2011-2012. The main programs to post decreases were as follows:
 - Pipeline Renewal Program;
 - Infrastructure Stimulus Fund;
 - Infrastructure programs of the Ministère des Affaires municipales, des Régions et de l’Occupation du territoire;
 - Knowledge Infrastructure Program;
 - Program related to the transfer of revenue from a portion of the federal excise tax on gasoline.
- a \$244-million decline in the allowance for losses on financial initiatives guaranteed by the Ministère du Développement économique, de l’Innovation et de l’Exportation;
- a decline of \$93 million in spending by the Prescription Drug Insurance Fund because of the lower-than-anticipated cost of medication;
- a \$435-million increase in spending with respect to the allowance for doubtful accounts at Revenu Québec, which is related to the increase in taxes receivable, due notably to growth of declared revenue and the stepping up of tax recovery activities;
- a \$385-million rise in program spending related to the impact of accounting harmonization of the funding and depreciation of fixed assets of organizations in the health and social services and education networks;
- an increase of \$293 million attributable to the new actuarial valuations of the pension plans;
- a decline of \$676 million in spending for the “Health and Social Services” mission, following the revision of consolidation adjustments estimates.

5. Variance analysis (cont'd)

5.1 Comparison of actual results with the Budget (cont'd)

Consolidated expenditure (cont'd)

Debt service has been revised downward by \$56 million compared with the forecast in the 2010-2011 Budget. The debt service of the Consolidated Revenue Fund amounted to \$6 984 million in 2010-2011, or \$4 million more than anticipated in the *2010-2011 Budget Plan*. The debt service of government bodies and special funds stood at \$1 951 million, or \$60 million less than forecast.

5. Variance analysis (cont'd)

5.2 Comparison of actual results with the previous fiscal year

Consolidated revenue

The Government's total revenue for fiscal 2010-2011 was up \$4 074 million from the previous fiscal year, as a result of an increase of \$3 691 million in own-source revenue and an increase of \$383 million in federal government transfers.

Own-source revenue

The increase of \$3 691 million, or 6.5%, in own-source revenue is due in particular to:

- a \$2 019-million climb in revenue from income and property taxes, caused primarily by:
 - an increase in personal income tax and health contributions, stemming from growth of 1.4% in average weekly remuneration and 2.2% in the number of jobs compared with the previous year;
- a \$1 341-million climb in revenue from consumption taxes taxes resulting mainly from:
 - the increase in sales tax revenue, which is attributable to growth in retail sales and the one percentage point rise in the QST rate as of January 1, 2011;
- growth of \$300 million in revenue from duties and permits, attributable primarily to:
 - an increase in mining duties due, in particular, to the impact of the new royalties system and of the growth in mining companies' annual earnings;
- a \$40-million drop in revenue from government enterprises;
- a \$35-million increase in the revenue of the Generations Fund.

Federal government transfers

The increase of \$383 million, or 2.2%, in federal government transfers can be explained mainly by:

- a \$197-million rise in equalization revenue;
- a \$161-million increase in health transfers.

5. Variance analysis (cont'd)

5.2 Comparison of actual results with the previous fiscal year (cont'd)

Consolidated expenditure

The increase of \$2 433 million, or 3.5%, in expenditure excluding debt service can be attributed primarily to the following changes in spending:

- \$1 135 million, or 3.8%, in spending for the "Health and Social Services" mission. This increase results notably from:
 - growth of \$483 million in labour, pay equity and other operating costs;
 - a \$334-million increase in the cost of medical services offered, mainly because of respective increases in the number of medical procedures performed and their average cost;
 - a climb of \$214 million stemming from the depreciation of fixed assets and the devaluation of assets of organizations in the health and social services network;
 - a \$105-million rise attributable to the results of the new actuarial valuations of the pension plans;
 - a \$72-million climb in the cost of medication and medical supplies;
 - an increase of \$72 million in the cost of service programs, such as the age-related loss of autonomy program and the assistance and clinical activities program;
 - the non-recurrence of \$130 million in costs related to the potential A(H1N1) flu pandemic in 2009-2010.
- \$665 million, or 3.8%, in spending for the "Education and Culture" mission. This growth stems in particular from:
 - a \$101-million rise in costs, resulting mainly from wage indexation and certain other growth factors;
 - growth of \$126 million attributable to the results of the new actuarial valuations of the pension plans;
 - an \$88-million increase in the depreciation of fixed assets of education network organizations;

5. Variance analysis (cont'd)

5.2 Comparison of actual results with the previous fiscal year (cont'd)

Consolidated expenditure (cont'd)

- growth of \$72 million due to an increase in the operating costs of universities, caused by a rise in clientele and growth in the cost of financial assistance for education expenses, in turn generated by an increase in the number of beneficiaries and the average bursary awarded to;
 - growth of \$49 million in costs related to additional commitments, stemming from the injection of resources to support students with disabilities or learning difficulties, the preparation of a new basic school regulation for secondary education, and the research program on student retention and academic success (Programme de recherche sur la persévérance et la réussite scolaire);
 - an increase in financial assistance paid by the Sports and Physical Activity Development Fund under the Canada-Québec agreement for implementing the Recreational Infrastructure Canada Program.
- \$715 million, or 8.0%, in spending for the "Economy and Environment" mission. This increase is due notably to:
 - a \$512-million rise in grants awarded by the Québec government under the following agreements:
 - the Canada-Québec agreement on the Pipeline Renewal Program concluded in June 2009;
 - the Canada-Québec agreement on the Infrastructure Stimulus Fund concluded in July 2009;
 - the Canada-Québec Infrastructure Agreement concluded in September 2008;
 - a \$90-million increase in the depreciation expense for fixed assets of the Land Transportation Network Fund as a result of substantial investments in transportation infrastructure over the past two years;
 - an \$87-million climb in financial assistance paid by the Québec government under the Canada-Québec agreement on the Knowledge Infrastructure Program.

5. Variance analysis (cont'd)

5.2 Comparison of actual results with the previous fiscal year (cont'd)

Consolidated expenditure (cont'd)

- \$237 million, or 4.1%, in spending for the "Support for Individuals and Families" mission. This growth stems notably from:
 - a \$142-million increase in the cost of family assistance measures:
 - \$77 million for the agreements concluded between the Québec government and home childcare providers during the negotiation of collective agreements;
 - \$65 million for the development of 4 822 new spaces in childcare centres, private day care centres and home childcare services.
- a decrease of \$319 million, or 4.8%, in spending for the "Administration and Justice" mission. This decrease results in particular from:
 - a \$587-million reduction in financial assistance paid by the Société de financement des infrastructures locales du Québec under the drinking water, wastewater and local road network infrastructure program, for which the first investment plan has been completed and the second was launched in 2011;
 - a \$143-million climb in the cost of remuneration stemming from an increase in the allowance for pay equity as well as an increase in the pension expense to take into account the results of the new actuarial valuations.

Lastly, debt service was up \$1 091 million from 2009-2010, including an increase of \$867 million in the debt service of the Consolidated Revenue Fund and \$224 million in the debt service of government bodies and special funds. This increase is due to the rise in interest rates, growth of the debt and the impact of the returns of the Caisse de dépôt et placement du Québec on the income of the Retirement Plans Sinking Fund, which is applied against the interest on the pension plans account.

6. Analysis of main trends

The main trends analysis presented in this section uses data from the consolidated financial statements of the Gouvernement du Québec.

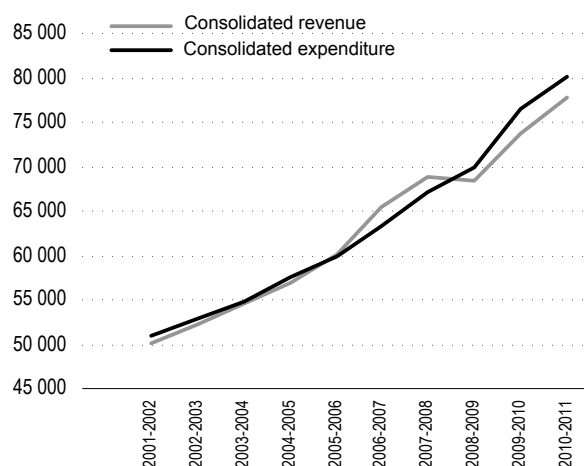

The data used to determine the trends discussed in this section were materially affected by:

- the impact of the 2006-2007 accounting reform, which incorporated the organizations in the health and social services and education networks into the Government's reporting entity and revised the Government's accounting policies to bring them into complete conformity with Canadian public sector accounting standards;
- the impact of the line-by-line consolidation of organizations in the health and social services and education networks in 2009-2010. Previously, such organizations were accounted for using the modified equity method.

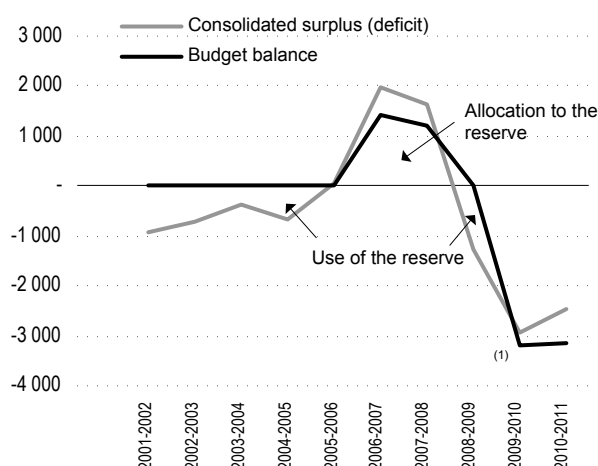

6. Analysis of main trends (cont'd)

Budget balance within the meaning of the *Balanced Budget Act*

Change in revenue and expenditure
(in millions of dollars)

Change in budget balance
(in millions of dollars)

(1) The sections of the *Balanced Budget Act* that prohibit a budgetary deficit do not apply to fiscal 2009-2010 to 2012-2013.

In fiscal 2006-2007 and 2007-2008, the Government achieved surpluses thanks to robust tax receipts related to sustained economic growth, additional profits by Hydro-Québec and the reform of the equalization program.

As a result of these surpluses, the Government was able to accumulate \$2.4 billion¹ in the stabilization reserve. The difference between the consolidated surplus (deficit) in the Public Accounts and that within the meaning of the *Balanced Budget Act*, stems mainly from revenue allocated to the Generations Fund and the use of the stabilization reserve to maintain a balanced budget in a budgetary deficit situation.

However, in 2008-2009 and 2009-2010, the financial crisis that dragged the global economy into recession led to a substantial deterioration in the Government's financial balances for those two years. Therefore, Québec introduced an economic action plan to offset the recession's impact on the economy. As a result, the Government posted a consolidated deficit from 2008-2009 to 2010-2011. For fiscal 2010-2011, the budget balance within the meaning of the *Balanced Budget Act* was in deficit by \$3 150 million. The Government adopted a plan to restore fiscal balance, which forecasts that this goal will be achieved in 2013-2014.

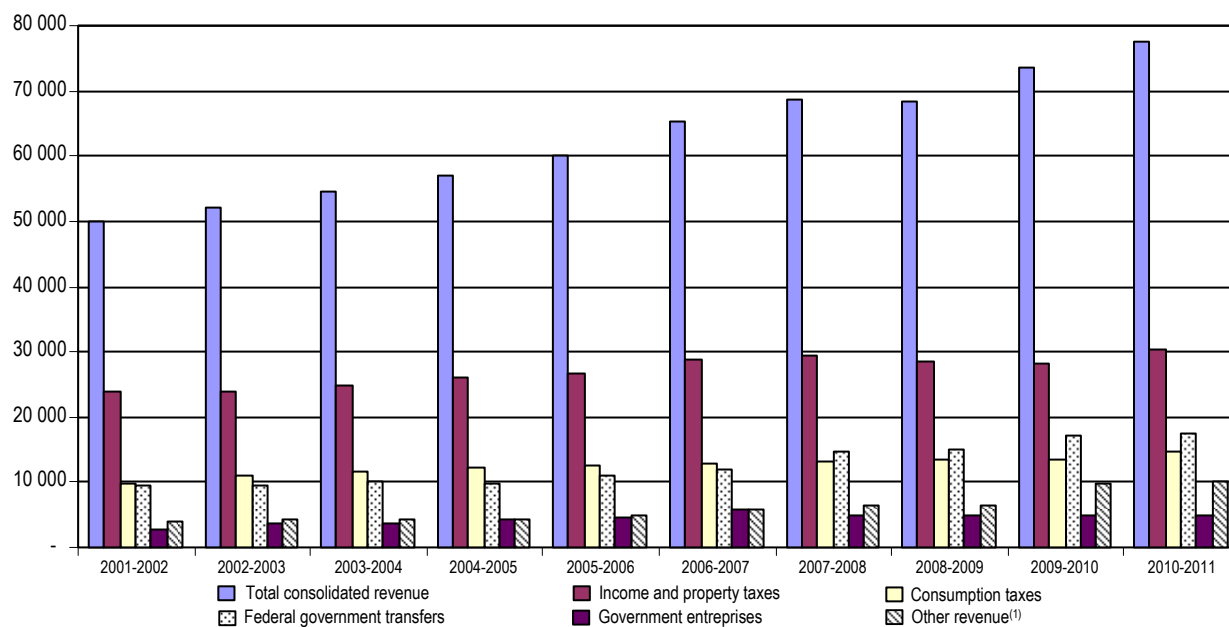

¹ Including \$109 million from the surplus balance recognized for fiscal 2006-2007 that had not been allocated to the reserve.

6. Analysis of main trends (cont'd)

Revenue

Change in consolidated revenue

REVENUE BY SOURCE
(in millions of dollars)

(1) Includes revenue from duties and permits, miscellaneous revenue and Generations Fund revenue.

The Government's consolidated revenue rose from \$50.0 billion to \$77.7 billion from fiscal 2001-2002 to 2010-2011. During that period, the average annualized growth of this revenue was 5.0% while that of GDP was 3.6%.

The own-source revenue of organizations in the health and social services and education networks has been included in consolidated revenue ever since these networks were consolidated in 2009-2010. Such revenue, which amounts to roughly \$4 billion, includes, among other things, school property taxes, user contributions and tuition fees.

Total revenue grew constantly, except in 2001-2002 and 2008-2009, when decreases were recorded for income and property tax revenue.

6. Analysis of main trends (cont'd)

Revenue (cont'd)

Change in consolidated revenue (cont'd)

Income and property taxes

Revenue from income and property taxes increased from 2002-2003 to 2007-2008. It decreased in 2008-2009 and 2009-2010, due notably to the impact of the following: the financial crisis and the recession on reported income; the home renovation tax credit and other fiscal measures implemented under the economic action plan to support the economy during the recession; the raising of taxable income thresholds and the indexation of non-refundable income tax credits associated with the reduction of personal income tax; and the fiscal measures announced in the 2007-2008 to 2009-2010 budgets in regard to corporate taxes. Tax revenue resumed its upward progression in 2010-2011, reaching \$30 323 million. It grew by an average of 2.6% per year from 2001-2002 to 2010-2011.

Consumption taxes

Revenue from consumption taxes increased from \$9 913 million in 2001-2002 to \$14 807 million in 2010-2011. It has thus grown steadily since 2001-2002, except when it fell slightly in 2009-2010. The average annual growth rate for the period was 4.6% owing to sustained growth in retail sales.

Federal government transfers

Federal government transfer revenue, which amounted to \$17 493 million in 2010-2011, has risen substantially over the past few years particularly on account of changes to health transfers and to the equalization program.

Government enterprises

Revenue from government enterprises, which consists mainly of the results of Hydro-Québec, Loto-Québec and the Société des alcools du Québec, increased from \$2 731 million in 2001-2002 to \$4 838 million in 2010-2011.

Other revenue

Lastly, other revenue grew substantially from 2005-2006 to 2010-2011 owing to, among other things:

- penalties and interest charged by Revenu Québec following the considerable increase in assessments made in recent years as a result of efforts to combat tax evasion;
- the inclusion of new entites due to the change in status of certain bodies following the 2006-2007 accounting reform;

6. Analysis of main trends (cont'd)

Revenue (cont'd)

Change in consolidated revenue (cont'd)

Other revenue (cont'd)

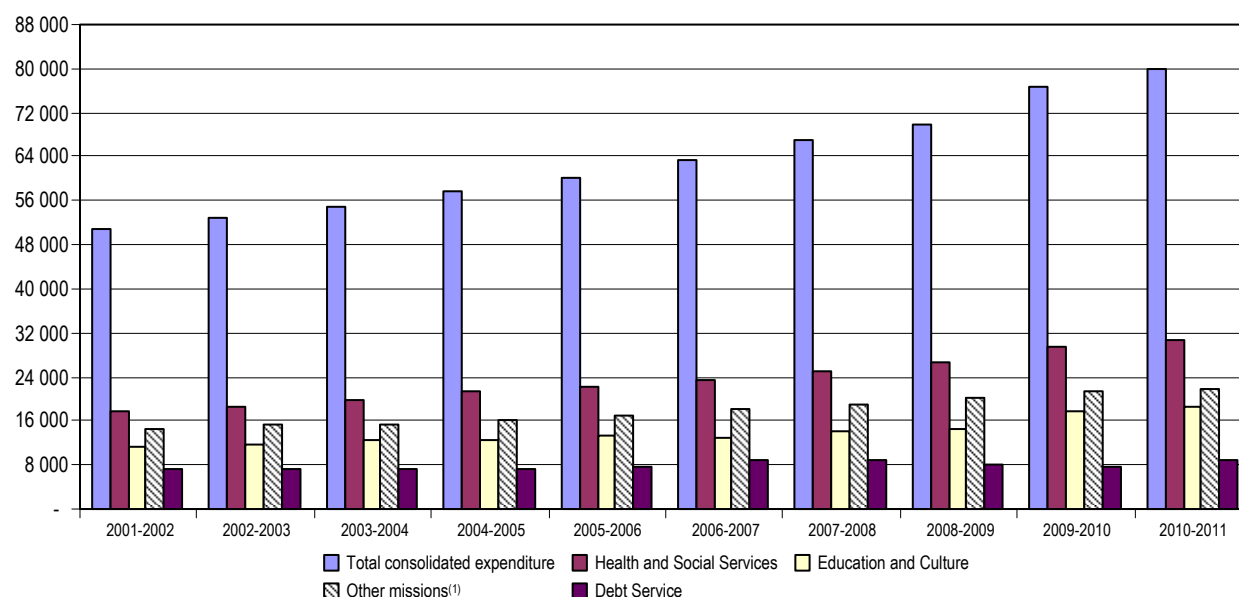

- the addition of user contributions and tuition fees following the line-by-line consolidation of organizations in the health and social services and education networks as of 2009-2010;
- revenue from blood products sold to Québec hospital centres by Héma-Québec from 2005-2006 to 2008-2009;
- the exceptional non-recurring gain realized in 2008 by the Société immobilière du Québec on the sale of three of its buildings;
- the addition of Generations Fund revenue as of January 1, 2007.

6. Analysis of main trends (cont'd)

Expenditure

Change in consolidated expenditure

EXPENDITURE BY MISSION
(in millions of dollars)

(1) Includes the "Economy and Environment", "Support for Individuals and Families", and "Administration and Justice" missions.

Between 2001-2002 and 2010-2011, the Government's consolidated expenditure increased by \$29.2 billion, from \$50.9 billion to \$80.1 billion. The average annual growth of this spending was 5.2%.

Consolidated expenditure has risen since 2009-2010 due to the line-by-line consolidation of organizations in the health and social services and education networks. The impact of this spending on the annual deficit has been offset by including the networks' own-source revenue in consolidated revenue. In 2009-2010, consolidated expenditure increased by approximately \$4 billion.

Health and Social Services and Education and Culture missions

The expenditures of the "Health and Social Services" and "Education and Culture" missions have climbed constantly, and this trend has been even more pronounced in the health sector. As at March 31, 2011, these expenditures accounted for 61.5% of consolidated expenditure and, of that share, 38.5% was for the "Health and Social Services" mission and 23.0% for the "Education and Culture" mission.

6. Analysis of main trends (cont'd)

Expenditure (cont'd)

Change in consolidated expenditure (cont'd)

Other missions

The expenditures of all the other missions have also increased in recent years, particularly because of:

- growth in financial support for childcare centres and other day care services;
- the creation of new government bodies, such as the Société de financement des infrastructures locales du Québec, to provide municipal bodies with financial assistance for carrying out their infrastructure projects, and the Green Fund, to support the implementation of measures fostering sustainable development and offer financial support to organizations active in the environment field;
- the rise in the allowance for doubtful accounts, owing to the increase in assessments made by Revenu Québec;
- growth in spending on municipal affairs and the regions, particularly to improve access to housing and to provide the necessary funding for building water supply and sewer systems and for treating municipal wastewater in all Québec regions;
- the increase in the budgets allocated to public safety, notably to cover costs related to the Sûreté du Québec, correctional services and policing affairs;
- the inclusion of new line-by-line consolidated entities due to the change in status of certain bodies, particularly the Société de l'assurance automobile du Québec and the Société des établissements de plein air du Québec;
- the increase in spending related to investments in road network improvement and development, transportation systems and road network maintenance.

Debt service

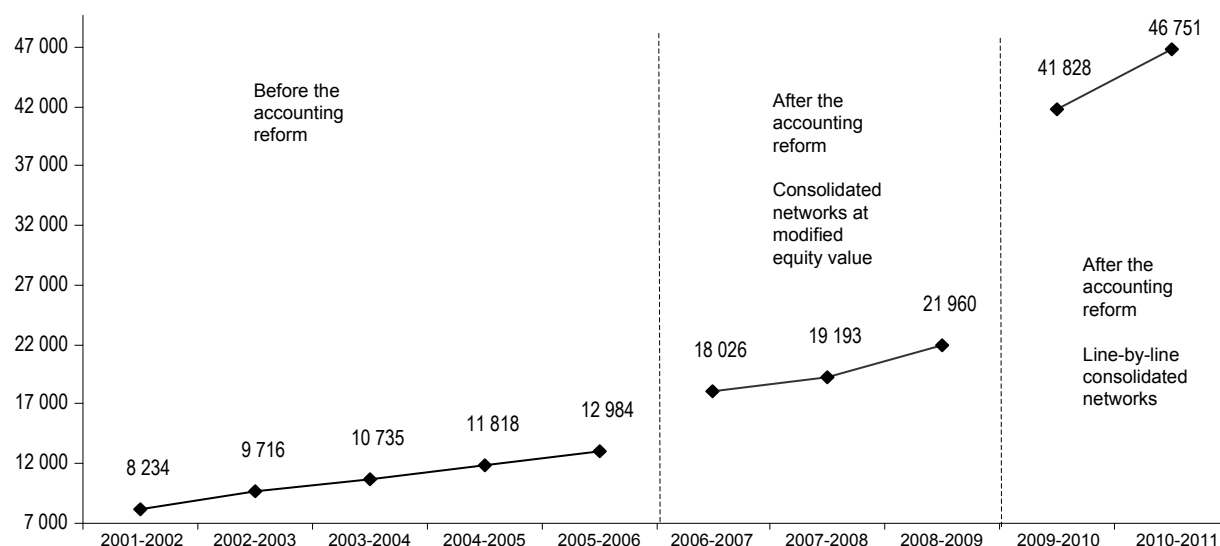

Debt service increased by an average of 2.3% per year between 2001-2002 and 2010-2011. It stood at \$8 935 million in 2010-2011.

6. Analysis of main trends (cont'd)

Fixed assets

Change in the net book value of fixed assets

(in millions of dollars)

The net book value of fixed assets increased by \$5.0 billion over the past year, from \$41.8 billion as at March 31, 2010 to \$46.8 billion as at March 31, 2011. This shows that annual investments in fixed assets have outstripped the annual depreciation of the Government's fixed assets as a whole. The remaining useful life of fixed assets is thus better today than it was several years ago.

Changes in the Government's accounting policies have entailed a substantial increase in the net value of fixed assets on two occasions in the past 10 years:

- in 2006-2007, when it increased by \$3.8 billion following the accounting reform, which changed the status of certain organizations from that of a government enterprise to that of a line-by-line consolidated non-budget-funded body;
- in 2009-2010, when it rose by \$16.8 billion as a result of the line-by-line consolidation of organizations in the health and social services and education networks.

Complex networks¹ consist mainly of net investments in road infrastructure. As at March 31, 2011, such investments accounted for 37.2% of the total net book value of fixed assets.

¹ See the consolidated financial statements on page 111.

6. Analysis of main trends (cont'd)

Gross debt

Government's gross debt

Change in the Government's gross debt

(in millions of dollars)

6. Analysis of main trends (cont'd)

Gross debt (cont'd)

Since the line-by-line consolidation of the financial results of organizations in the health and social services and education networks in 2009-2010, all debts contracted by these organizations have been included in those of the Government. Previously, only the portion of debt contracted by these organizations with bodies included in the Government's reporting entity were taken into account. To take the different accounting methods into account, the gross debt trend analysis has been presented in two periods.

6. Analysis of main trends (cont'd)

Gross debt (cont'd)

Growth of the gross debt from 2002 to 2009

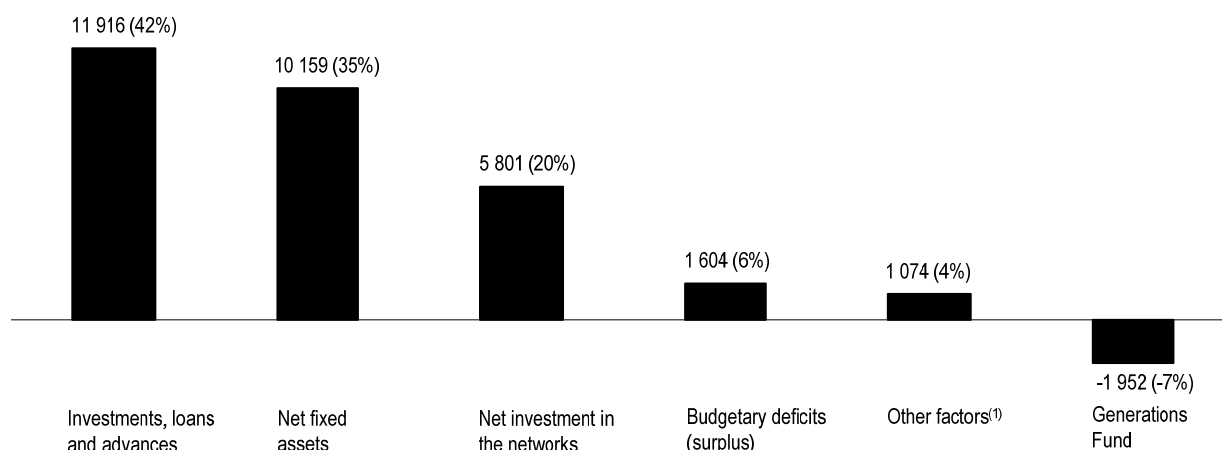

The gross debt, which stood at \$123.9 billion as at March 31, 2002, reached \$152.5 billion as at March 31, 2009. This represents an increase of \$28.6 billion, resulting mainly from:

- investments, loans and advances of \$11.9 billion to government enterprises;
- investments of \$10.2 billion by the Government in its fixed assets;
- a \$5.8-billion increase in the Government's investments in the health and social services and education networks due notably to loans by Financement-Québec to finance its fixed assets.

In addition, the Generations Fund reduced the growth of the gross debt by nearly \$2.0 billion.

Factors responsible for growth in the gross debt from 2002 to 2009

(in millions of dollars)

Note: The data for 2009-2010 and thereafter are not included in this chart because, following the line-by-line consolidation of the health and social services and education networks, they were not comparable with those for 2002 to 2009.

- (1) Other factors include, in particular, the change in "Other accounts", such as accounts receivable and accounts payable, and the change in the value of the debt in foreign currency.

6. Analysis of main trends (cont'd)

Gross debt (cont'd)

Growth of the gross debt from 2009 to 2011

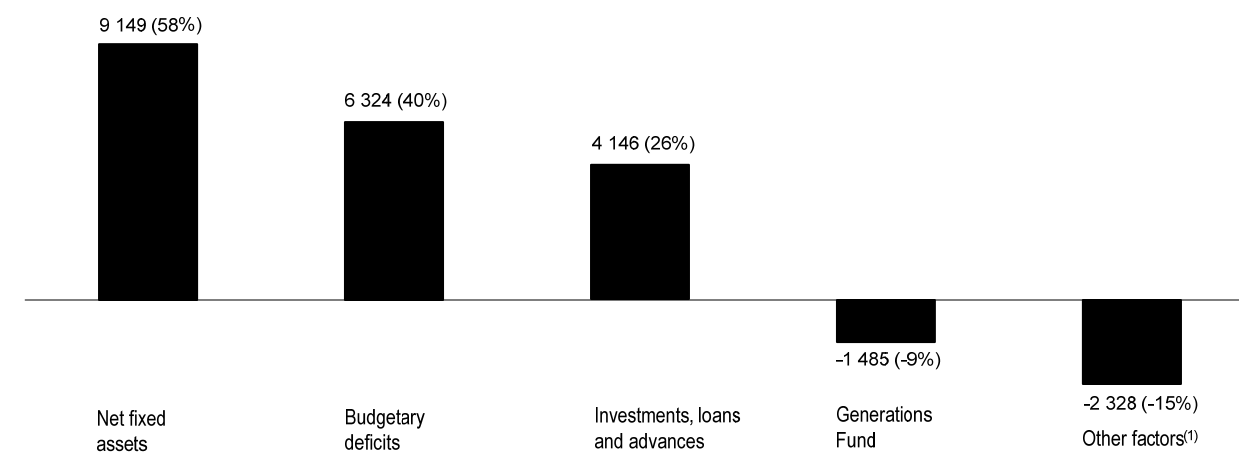

Once the gross debt as at March 31, 2009 had been restated, following the line-by-line consolidation of organizations in the health and social services and education networks, it stood at \$157.6 billion. It amounted to \$173.4 billion as at March 31, 2011. Accordingly, for fiscal 2009-2010 and 2010-2011, the Government's gross debt rose by \$15.8 billion on a comparable basis. This increase is due mainly to:

- investments of \$9.1 billion by the Government in its fixed assets;
- budgetary deficits of \$6.3 billion;
- investments, loans and advances totalling \$4.1 billion;

The increase in the gross debt has been offset by:

- the change in other factors (e.g. the change in "Other accounts", such as accounts receivable and accounts payable, and the change in the value of the debt in foreign currency) which lowered the gross debt by \$2.3 billion;
- deposits in the Generations Fund, which brought the gross debt down by \$1.5 billion.

Factors responsible for growth in the Government's gross debt from 2009 to 2011 (in millions of dollars)

(1) Other factors include, in particular, the change in "Other accounts", such as accounts receivable and accounts payable, and the change in the value of the debt in foreign currency.

7. Results of the indicator analysis

The financial indicator analysis aims primarily to clarify and explain the information contained in the consolidated financial statements.

The Government presents eleven indicators to assess the state of its finances. These indicators are based on those published by the Public Sector Accounting Board of the Canadian Institute of Chartered Accountants (CICA) in statements of recommended practices.

Several indicators have been affected by the impact of the 2006-2007 accounting reform. This reform made it possible to bring the Government's accounting policies into complete conformity with Canadian public sector accounting standards. It also made it possible to integrate the organizations in the health and social services and education networks into the Government's reporting entity, initially at modified equity value and subsequently, in 2009-2010, on a line-by-line consolidation basis.

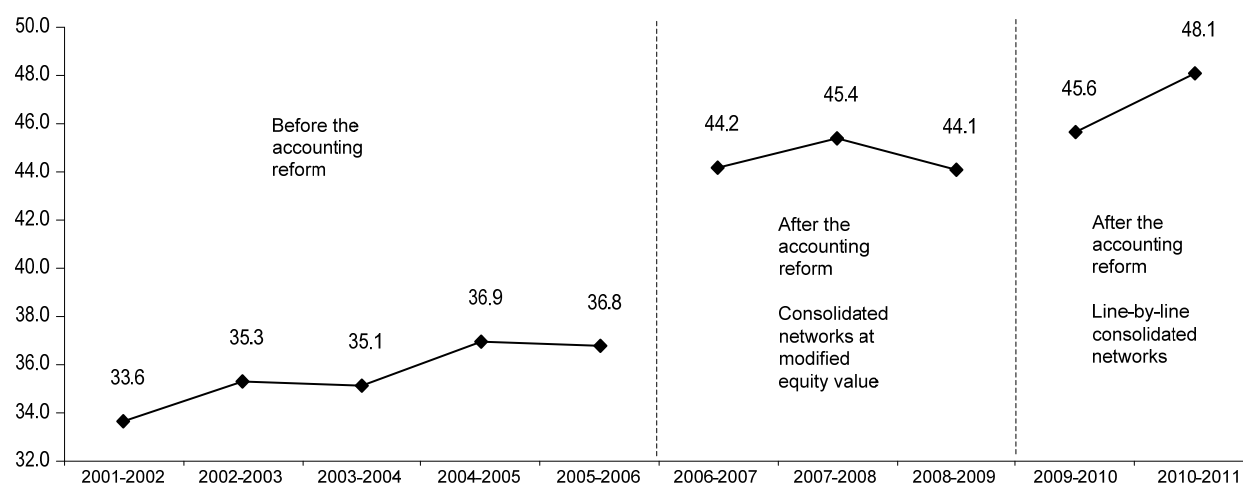

For the purposes of this section, GDP corresponds to nominal GDP.

7. Results of the indicator analysis (cont'd)

Indicator 1: Assets (financial and non-financial) to total liabilities

This indicator illustrates the extent to which the Government finances its current operations through borrowings. A ratio of over 100% indicates that a surplus was accumulated in the past and that the value of the Government's financial and non-financial assets is higher than that of its liabilities. A ratio of less than 100% indicates that a deficit was accumulated in the past and that the value of the Government's financial and non-financial assets is lower than that of its liabilities. An upward ratio illustrates a favourable trend.

Financial and non financial assets (as a percentage of total liabilities)

The ratio of financial and non-financial assets to total liabilities was 33.6% in 2001-2002. It rose to 48.1% as at March 31, 2011 due to the accounting reform of 2006-2007 and the line-by-line consolidation of organizations in the health and social services and education networks in 2009-2010. Taking the accumulated deficit into account, the value of assets is still lower than that of liabilities. In addition, an improvement can be observed in the ratio, showing that assets have climbed at a faster rate than liabilities. Over the past five years, borrowings have been used mainly to finance asset acquisitions.

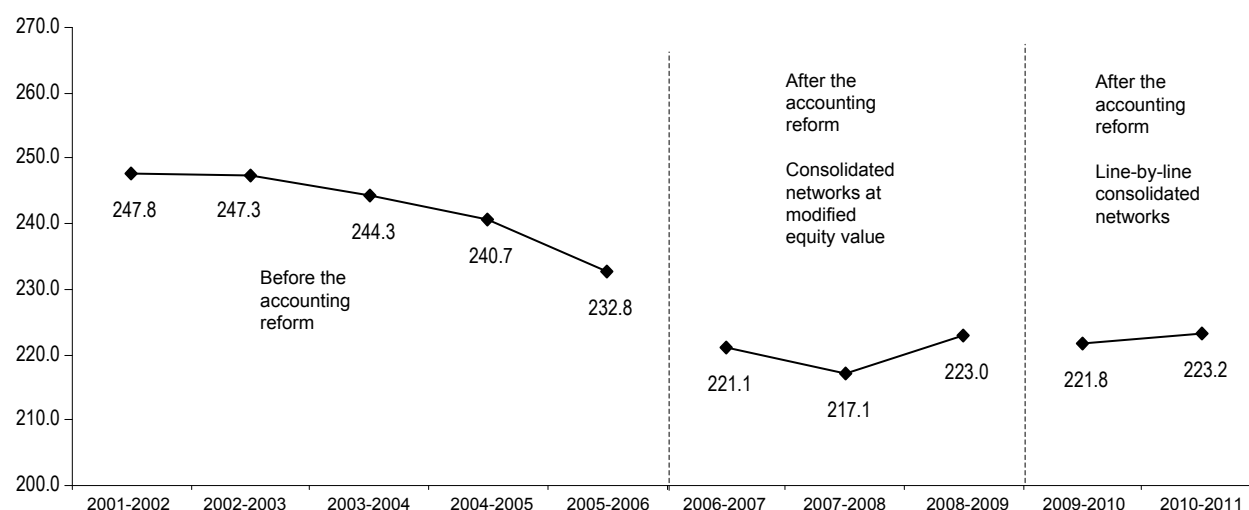

7. Results of the indicator analysis (cont'd)

Indicator 2: Gross debt to total revenue

This indicator is intended to put the size of the Government's gross debt into perspective by comparing it with the Government's revenue. A declining ratio indicates a decrease in the relative weight of the gross debt.

Gross debt

(as a percentage of total revenue)

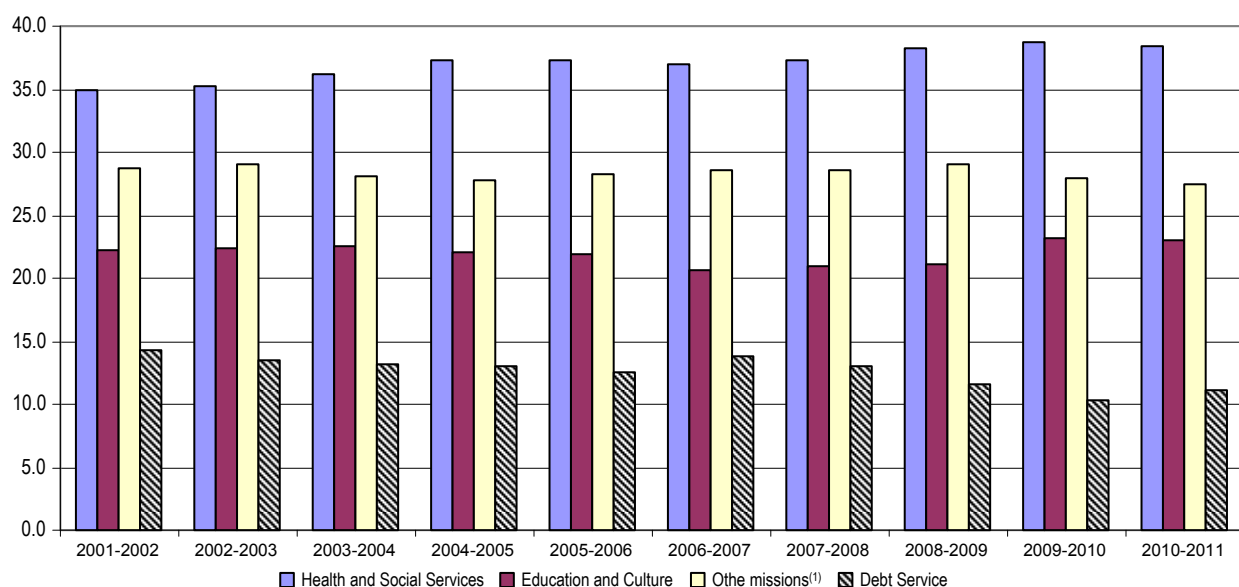

From 2001-2002 to 2005-2006, gross debt as a percentage of total revenue fell from 247.8% to 232.8%. From 2009-2010 to 2010-2011, the ratio rose slightly, from 221.8% to 223.2%.

7. Results of the indicator analysis (cont'd)

Indicator 3: Expenditures by mission to total expenditure

This indicator illustrates the trend in Government spending for a particular mission over time. To ensure the sustainability of all programs, the growth of spending for that mission must not be substantially higher than that of total spending.

Expenditures by mission (as a percentage of total expenditure)

(1) Includes the "Economy and Environment", "Support for Individuals and Families", and "Administration and Justice" missions.

The expenses of the "Health and Social Services" mission grew at an average annual rate of 6.3% from 2001-2002 to 2010-2011, compared with 5.2% for total consolidated expenditure, such that the proportion of the mission's expenses in expenditures as a whole rose from 34.9% to 38.5%. This indicator reflects the growing importance of expenditures for the "Health and Social Services" mission and the Québec government's will to continue including this mission among its top priorities. It also reflects the ever-growing needs entailed by the aging of the population.

This indicator shows that the proportion of expenditures devoted to the "Education and Culture" mission and "Other missions" has remained fairly stable.

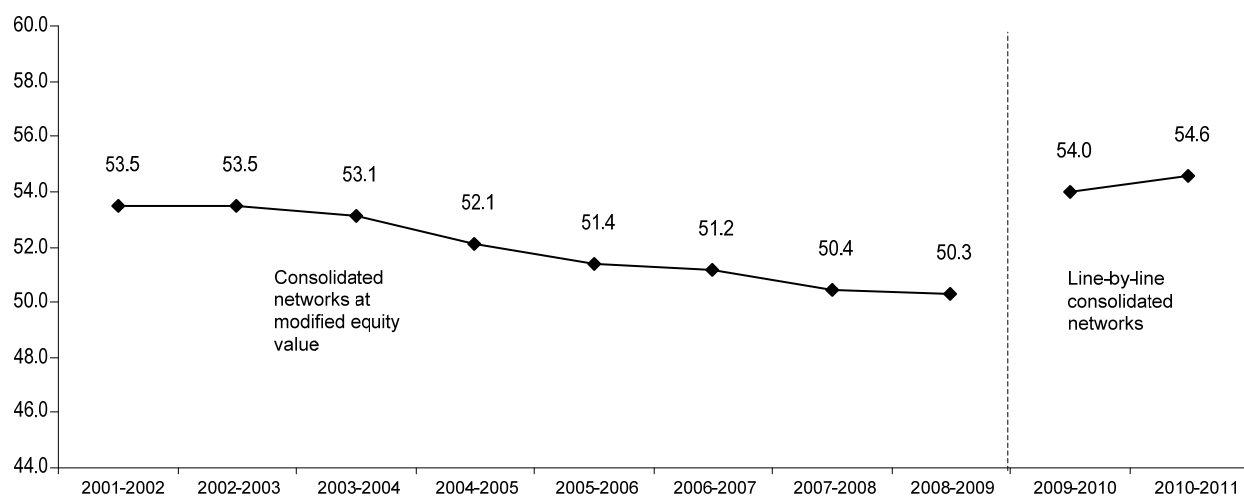

The share of total spending devoted to "Debt service" fell from 14.3% in 2001-2002 to 11.2% in 2010-2011. During that period, the average annual growth in "Debt service" was 2.3% compared with 5.6% in the case of consolidated expenditure excluding debt service.

7. Results of the indicator analysis (cont'd)

Indicator 4: Gross debt to GDP

This indicator puts the Government's gross debt into perspective with the Government's ability to pay, as measured by gross domestic product. It is desirable that this ratio follow a downward trend as this reflects a decline in the relative weight of the gross debt.

Gross debt (as a percentage of GDP)

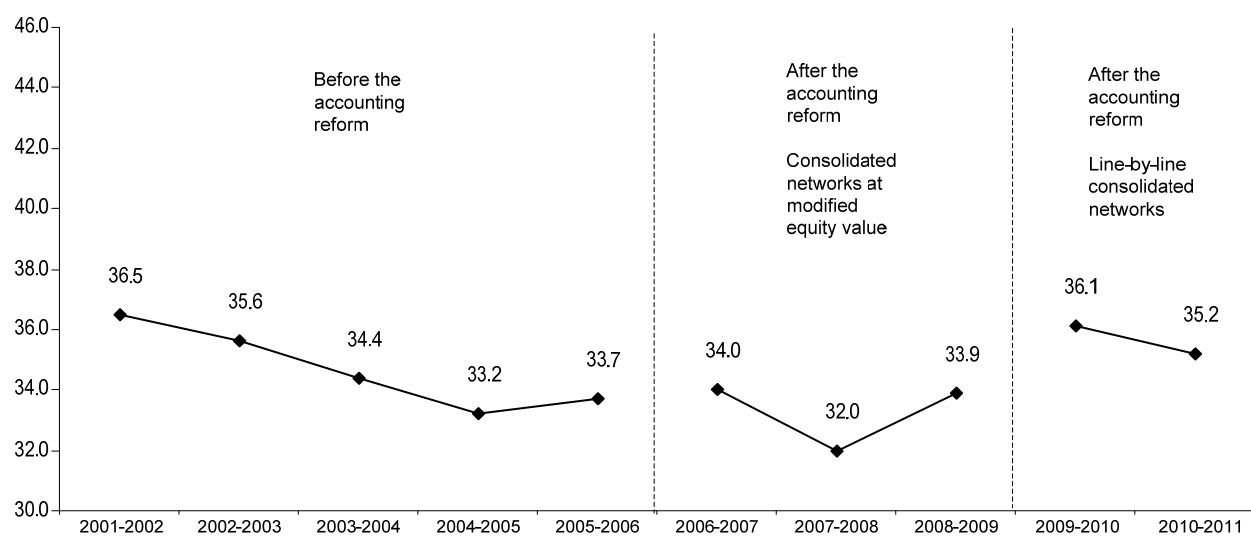

The ratio of gross debt to GDP improved from 53.5% to 50.3% from 2001-2002 to 2008-2009. In 2009-2010, it stood at 54.0% on the basis of the line-by-line consolidation of the health and social services and education networks. The ratio rose slightly in 2010-2011, to 54.6%.

7. Results of the indicator analysis (cont'd)

Indicator 5: Debt representing accumulated deficits to GDP

This indicator compares the debt representing accumulated deficits, or the debt not used to finance assets, with the Government's ability to pay, as measured by GDP. It is desirable that this ratio follow a downward trend as this means that the relative weight of the debt representing accumulated deficits is on the decline.

Debt representing accumulated deficits (as a percentage of GDP)

Note: Before taking into account the stabilization reserve.

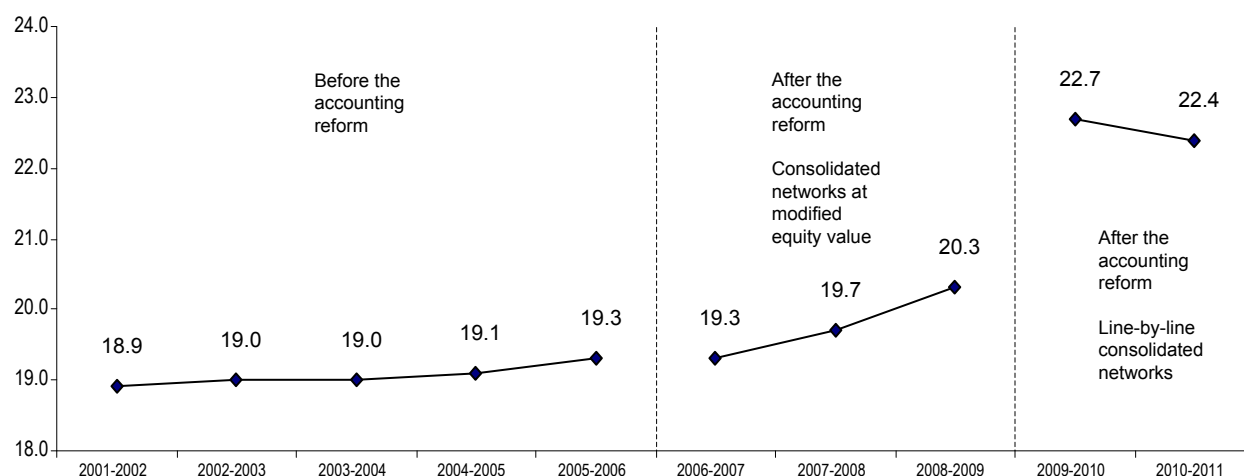

The ratio of the debt representing accumulated deficits to GDP improved from 2001-2002 to 2005-2006, falling from 36.5% to 33.7%. From 2009-2010 to 2010-2011, this ratio of the debt representing accumulated deficits to GDP improved falling from 36.1% to 35.2%. For 2006-2007 and thereafter, even though there had been accounting changes having an impact on the accumulated deficits, the ratio of the debt representing accumulated deficits to GDP remained fairly stable.

7. Results of the indicator analysis (cont'd)

Indicator 6: Consolidated expenditure to GDP

This indicator makes it possible to compare the growth rate of government spending over time with that of the economy. A decline in this indicator means that spending is growing less rapidly than the economy. Therefore, this indicator reveals the relative weight of the cost of public services in the economy.

Expenditures (excluding debt service) (as a percentage of GDP)

Expenditures excluding debt service as a percentage of GDP were relatively stable between 2001-2002 and 2005-2006, going from 18.9% to 19.3%, for an average rate of 19.1%. In 2008-2009, the ratio was 20.3% because of weak growth in GDP.

Since fiscal 2009-2010, following the line-by-line consolidation of organizations in the health and social services and education networks, consolidated expenditure has incorporated the networks' expenditures as a whole, which largely explains why the ratio rose to 22.7%. It is on this basis that the Government kept spending growth above GDP in order to continue supporting the economy and maintain public services during the recession. In 2010-2011, spending grew at a rate below that of GDP, bringing its relative weight in the economy down to 22.4%.

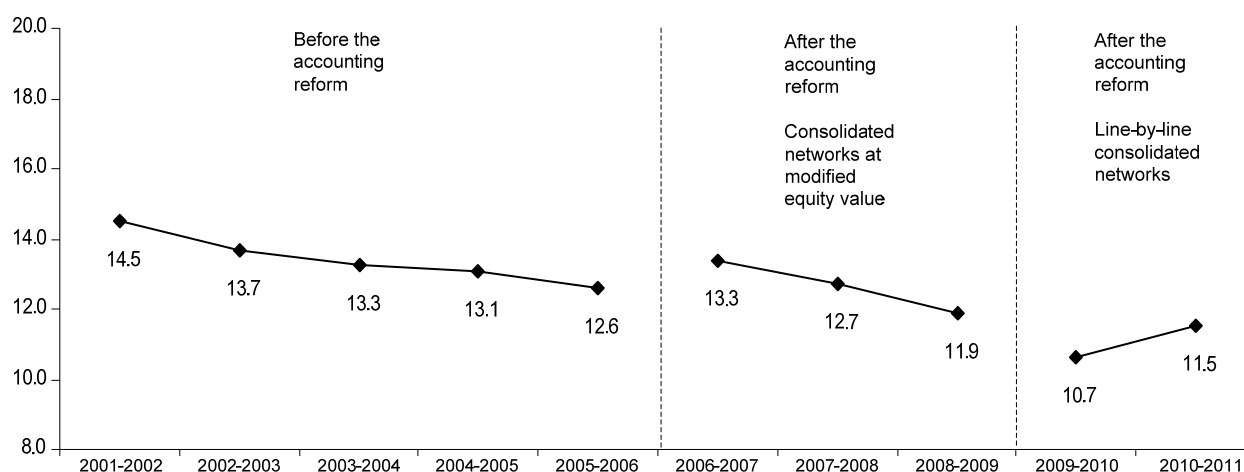

7. Results of the indicator analysis (cont'd)

Indicator 7: Debt service to total revenue

This indicator illustrates the share of government revenue that must be allocated to debt service. It is desirable that this ratio follow a downward trend since this means that a larger share of revenue can be devoted to program spending.

Debt service

(as a percentage of total revenue)

From 2001-2002 to 2005-2006, the debt service to total revenue indicator declined from 14.5% to 12.6%. Since the reform of government accounting in 2006-2007, this indicator has continued to fall, reaching 11.9% in 2008-2009. It stood at 10.7% in 2009-2010, taking into account the line-by-line consolidation of organizations in the health and social services and education networks, and rose to 11.5% in 2010-2011. Overall, the proportion of budgetary revenue devoted to debt service decreased over this period.

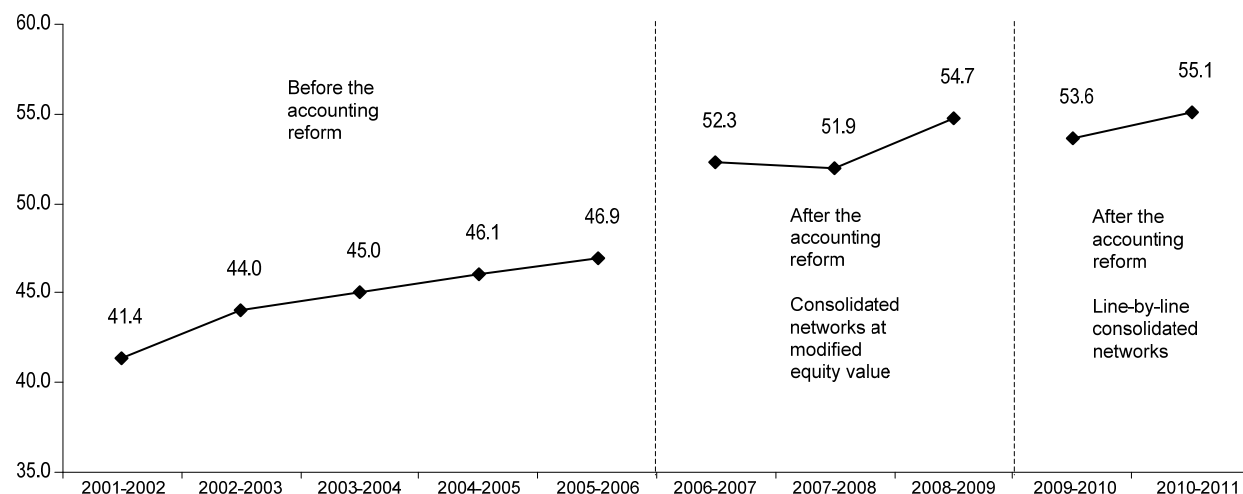

7. Results of the indicator analysis (cont'd)

Indicator 8: Net book value of fixed assets to the cost of fixed assets

This indicator shows the extent to which the estimated remaining useful life of tangible assets will enable the Government to supply products and services in the future.

Net book value of fixed assets

(as a percentage of the cost of fixed assets)

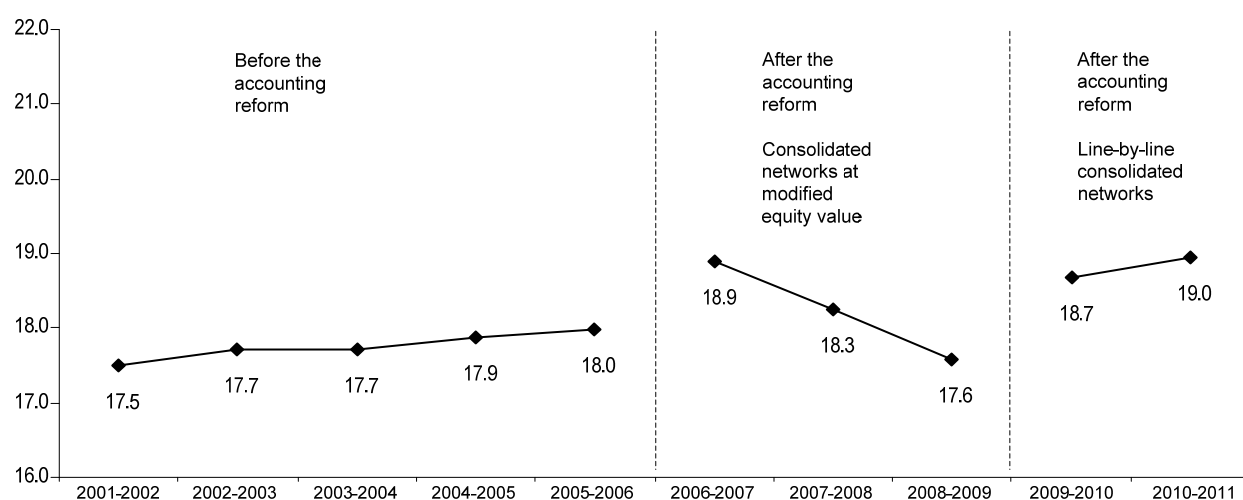

The net book value to the cost of fixed assets indicator has risen significantly over the past 10 years, from 41.4% as at March 31, 2002 to 55.1% as at March 31, 2011. This shows that annual investments in fixed assets have outstripped the annual depreciation of the Government's fixed assets as a whole. The average age and the remaining useful life of fixed assets are thus better today than they were several years ago, making it easier for the Government to deliver services.

7. Results of the indicator analysis (cont'd)

Indicator 9: Own-source revenue to GDP

This indicator shows the proportion of collective wealth that the Government must collect in order to fund public services. The Government's own-source revenue consists of income tax and other taxes, user fees and other revenue derived from its enterprises in particular. This revenue includes all of the Government's revenue, apart from transfers received from the federal government. Stability or a decline in this ratio over time tends to indicate a favourable situation.

Own-source revenue (as a percentage of GDP)

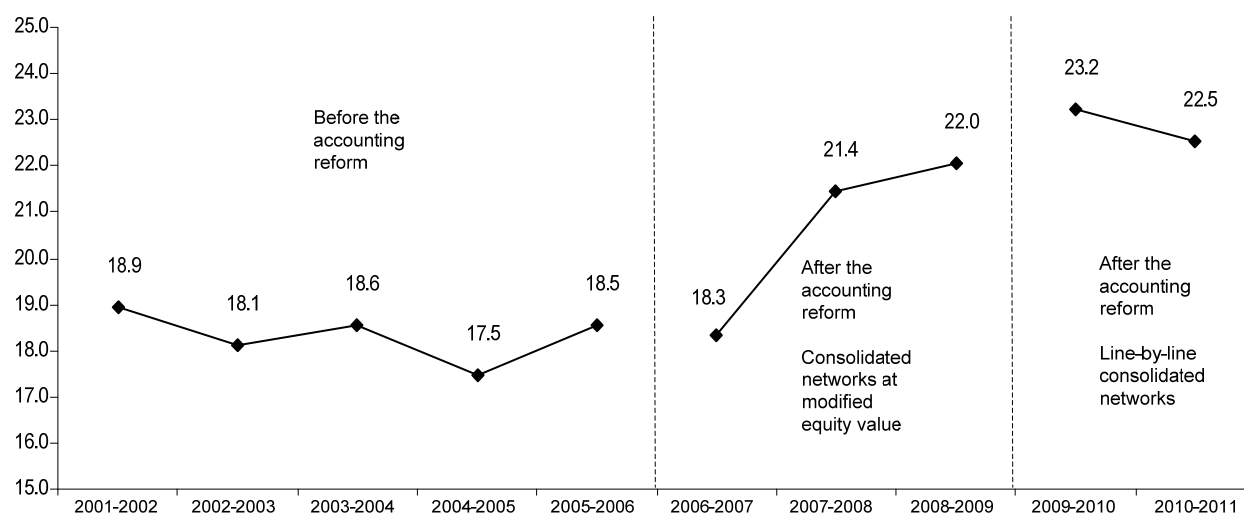

Own-source revenue to GDP remained fairly stable from 2001-2002 to 2005-2006, going from 17.5% to 18.0%. The increase in the ratio to 18.9% in 2006-2007 was due in large part to Hydro-Québec's additional earnings, resulting from the sale of its interest in certain enterprises. Over the following years, the ratio dropped, reaching 17.6% in 2008-2009, mainly because of the personal income tax reduction granted in 2008. The ratio rose to 18.7% in 2009-2010, owing to the increase in own-source revenue caused by the line-by-line consolidation of organizations in the health and social services and education networks. Due to the impact of the plan to restore fiscal balance on revenue, it stood at 19.0% in 2010-2011.

7. Results of the indicator analysis (cont'd)

Indicator 10: Transfers from the federal government to total revenue

Transfers received from the federal government comprise equalization payments, payments from transfers for health care and for post-secondary education and other social programs, and amounts transferred by the federal government under various agreements. This indicator measures the portion of the Québec government's revenue that comes from the federal government.

Federal government transfers (as a percentage of total revenue)

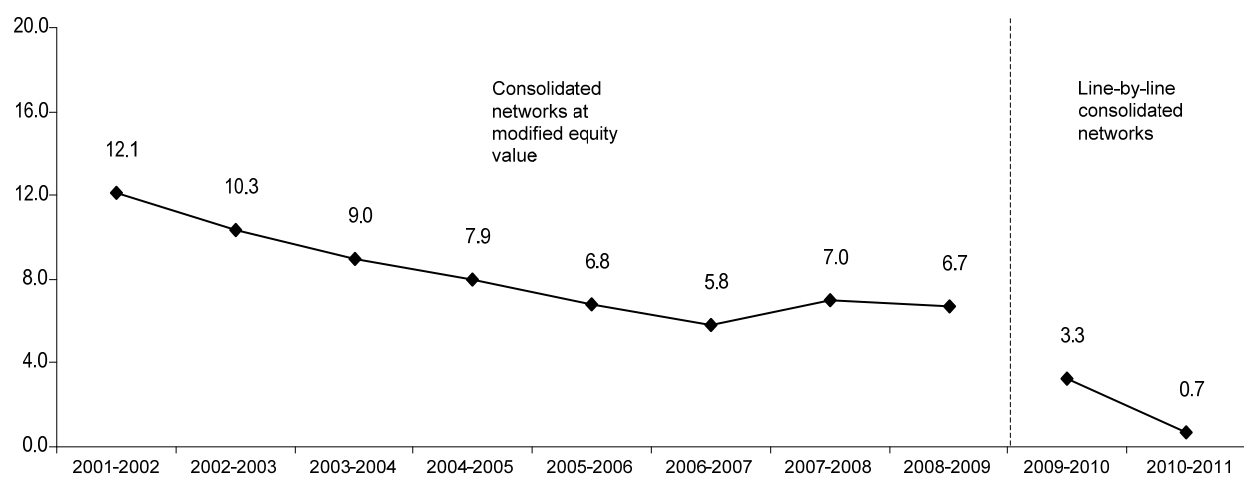

The proportion of federal transfers in total revenue remained fairly stable from 2001-2002 to 2006-2007, ranging from 17.5% to 18.9%, or averaging 18.3%. In 2007-2008, the proportion of federal transfers in total revenue rose to 21.4% owing notably to a thorough reform of the equalization program. In 2010-2011, the proportion reached 22.5%.

7. Results of the indicator analysis (cont'd)

Indicator 11: Debt in foreign currency to gross debt

This indicator illustrates the degree to which the Government's debt service may be affected by fluctuations in the Canadian dollar. A downward trend in the proportion of debt in foreign currency means that the vulnerability of debt service is on the decline.

Debt in foreign currency (as a percentage of gross debt)

Note: Gross debt including advance borrowings.

Since 2001-2002, the proportion of the debt denominated in foreign currencies has fallen sharply, from 12.1% as at March 31, 2002 to 6.7% as at March 31, 2009. The proportion has fallen even further since 2009-2010, from 3.3% as at March 31, 2010 to 0.7% as at March 31, 2011. These decreases make debt service less vulnerable to fluctuations in the Canadian dollar relative to the currencies in which the Government holds part of its debt.

APPENDIX A

Financial statistics

These tables present the trends observed over the past 14 years for several consolidated financial statement items. The historical data of the consolidated financial statement items are those established at the date they were published, without restatement. In addition, tables A.1 and A.2 and the explanatory notes identify the changes made to previous consolidated financial statements. However, some reclassifications have been made to revenue and expenditure items to bring them into conformity with the historical data as presented in the budget plan.

Historical data for consolidated financial statement items

FISCAL YEAR ENDED MARCH 31

(in millions of dollars)

Fiscal year	Revenue	Expenditure	(Deficit) or surplus	Financial assets	Liabilities	Net debt ⁽¹⁾	Non-financial assets ⁽²⁾	Accumulated deficits ⁽³⁾

(1) The net debt represents liabilities minus the financial assets presented in the consolidated statement of financial position.

(2) See Table A.1 (p. 62) for a breakdown of the annual change.

(3) See Table A.2 (p. 63, 64) for explanations of the change in accumulated deficits based on factors other than the fiscal year surplus (deficit).

(4) Does not take into account the \$760 M allocated to the Generations Fund.

(5) Does not take into account the \$725 M allocated to the Generations Fund and the \$433 M used from the stabilization reserve.

(6) Judgment must be exercised in comparing the data for 2009-2010 and thereafter with those for prior years because of the impact of the line-by-line consolidation of organizations in the health and social services and education networks.

(7) Does not take into account the \$587 M allocated to the Generations Fund and the \$1 845 M used from the stabilization reserve.

(8) Does not take into account the \$449 M allocated to the Generations Fund and the \$1 201 M allocated to the budgetary reserve.

(9) Does not take into account the \$584 M allocated to the Generations Fund and the \$1 300 M allocated to the budgetary reserve.

(10) Judgment must be exercised in comparing the data for 2006-2007 and thereafter with those for prior years because of the impact of the December 2007 accounting reform.

(11) Does not take the budgetary reserve of \$950 M into account.

APPENDIX A

Financial statistics (cont'd)

Table A.1 – Breakdown of the annual change in non-financial assets

FISCAL YEAR ENDED MARCH 31

(in millions of dollars)

Fiscal year	Current year change			Restatements of the balance of non-financial assets			Total change for fiscal year
	Net book value of fixed assets	Inventories and prepaid expenses	Net investment in the networks	Net book value of fixed assets	Inventories and prepaid expenses	Net investment in the networks	
2010-2011	4 923	(19)					4 904
2009-2010	4 226	83		16 112 ^{(1) (2)}	334	(9 039) ⁽²⁾	11 716
2008-2009	2 297	46	622	(290) ⁽³⁾		(2 055) ⁽⁴⁾	620
2007-2008	1 457	30	487	1 639 ⁽⁵⁾		102 ⁽⁵⁾	3 715
2006-2007	1 219	10	1 002	2 184 ⁽⁶⁾	152 ⁽⁷⁾	8 881 ⁽⁸⁾	13 448
2005-2006	1 166						1 166
2004-2005	1 083						1 083
2003-2004	1 019						1 019
2002-2003	1 482			73 ⁽⁹⁾			1 555
2001-2002	995						995
2000-2001	473						473
1999-2000	359			101 ⁽¹⁰⁾			460
1998-1999	217			36 ⁽¹¹⁾			253
1997-1998	199			5 781 ⁽¹²⁾			5 980

(1) Adoption of a component-based approach for capitalizing and amortizing the cost of road infrastructure fixed assets. Increase of \$470 M in net value.

(2) Incorporation of organizations in the health and social services and education networks using the line-by-line consolidation method rather than the modified equity method. The net book value of fixed assets as at April 1, 2009 thus incorporated into the consolidated financial statements was \$15 642 M. The net investment has been eliminated and replaced by fixed assets and various other asset and liability items.

(3) Harmonization of the accounting policies of Immobilière SHQ with those of the Government concerning recognition of the cost of fixed assets under results is now done using the straight-line method, whereas previously it was done using the compound interest method.

(4) Harmonization of the accounting policies used by organizations in the health and social services network and by school boards with those of the Government, in particular, through the implementation of a fixed asset capitalization and depreciation policy and the adoption of accrual accounting for all the revenue and expenditure of these organizations.

(5) Change in the status of Immobilière SHQ, which is now consolidated line by line, whereas it used to be considered a government enterprise.

(6) \$2 240 M arising mainly from the change in status of certain bodies that are now consolidated line by line, whereas they used to be considered government enterprises, and (\$56 M) in depreciation recapture at the Agence métropolitaine de transport.

(7) Change in the accounting policy for recording these items.

(8) Inclusion in the Government's reporting entity of the vast majority of organizations in the health and social services and education networks.

(9) \$57 M for capitalizing the cost of improvements to the premises of the Société Immobilière du Québec and \$16 M for the change in the status of a government enterprise.

(10) Reassessment of fixed assets following the 1997-1998 accounting reform.

(11) Capitalization of cadastral plan expenses.

(12) Recording of the opening balance for fixed assets during the 1997-1998 accounting reform.

Financial statistics (cont'd)

Table A.2 – Other factors affecting the balance of accumulated deficits

FISCAL YEAR ENDED MARCH 31
(in millions of dollars)

Fiscal year	Enterprises comprehensive income and other ⁽¹⁾	Restatements of accumulated deficits		Total for other factors	Restatement details
		Government enterprises	Departments and bodies		
2010-2011	(229)	(253)	(1 413)	(1 895)	Government enterprises: (\$95 M) for obligations related to the decommissioning of fixed assets, (\$158 M) for complying with International Financial Reporting Standards (IFRS). Departments and bodies: (\$1 413 M) for contaminated land remediation obligations recorded as environmental liabilities.
2009-2010	(452)	(3 749)	(2 450)	(6 651)	Government enterprises: (\$3 758 M) for adopting the straight-line method for tangible fixed assets to replace a method not recognized by International Financial Reporting Standards (IFRS); \$9 M for various items. Departments and bodies: (\$1 234 M) for harmonizing the accounting policies of organizations in the health and social services and education networks with those of the Government to make it easier to incorporate these organizations into the Government's consolidated financial statements using the line-by-line consolidation method; \$431 M for adopting a component-based approach for capitalizing and amortizing the cost of road infrastructure fixed assets; (\$683 M) for contaminated land remediation obligations recorded as environmental liabilities; (\$1 129 M) for changing the valuation basis for calculating interest on the pension plans; and \$165 M for changing the method used to record personal income tax collected by the federal government on behalf of Québec.
2008-2009	111	—	(2 708)	(2 597)	Departments and bodies: (\$2 055 M) for harmonizing the accounting policies of organizations in the health and social services and education networks with those of the Government; (\$290 M) for harmonizing the accounting policies of Immobilière SHQ with those of the Government in regard to the recognition of the cost of its fixed assets under results; (\$193 M) for the change in the amortization period for the actuarial gains and losses of certain pension plans; and (\$170 M) for contaminated land remediation obligations recorded as environmental liabilities.
2007-2008	303	(20)	(345)	(62)	Government enterprises: (\$28 M) for the change to the accounting policy for recording financial instruments; \$8 M for a change concerning employee future benefits. Departments and bodies: (\$345 M) for contaminated land remediation obligations recorded as environmental liabilities.
2006-2007	11	830	(6 894)	(6 053)	Government enterprises: Change to the accounting policy for recording financial instruments. Departments and bodies: (\$6 426 M) for the accounting reform, i.e. (\$3 220 M) for including in the Government's reporting entity the vast majority of organizations in the health and social services and education networks; (\$1 904 M) for recording revenue from income and property taxes, consumption taxes and duties and permits using the accrual method; (\$484 M) for reevaluating the time when transfer expenditures should be recognized; (\$335 M) for recognizing the grant portion arising from significant concessionary terms awarded for investments and loans granted; (\$125 M) for the change to the policies for recording the Retirement Plans Sinking Fund; (\$708 M) for applying the standards for financial instruments; \$152 M for the change to the accounting policy for recording inventories and prepaid expenses; \$198 M for the other components of the reform; and (\$468 M) for the change to the accounting policy for contaminated land remediation obligations recorded as environmental liabilities.

(1) As of fiscal 2006-2007, corresponds to the comprehensive income of government enterprises. For 2001-2002 to 2005-2006, corresponded to the foreign exchange translation adjustments, and for 1997-1998 to 1999-2000, corresponded to the surplus of the municipal assessment for fixed assets of the Corporation d'hébergement du Québec.

APPENDIX A

2001-2002	88	(2 218)	—	(2 130)	Government enterprises: (\$1 306 M) for foreign currency translation and (\$912 M) for the introduction of a provision for deviations in the real rate of return.
2000-2001	—	(173)	(53)	(226)	Government enterprises: (\$235 M) following the adoption of Canadian accounting standards and \$62 M for the change to the accounting policies for certain allowances and the actuarial liability. Departments and bodies: (\$12 M) for sick leave and vacations and (\$41 M) for the change to the accounting policy for recording certain building repair and upgrading expenditures.
1999-2000	26	—	(21)	5	Departments and bodies: \$101 M for the reassessment of fixed assets following the 1997-1998 accounting reform and (\$122 M) for other items.
1998-1999	7	—	63	70	Departments and bodies: \$27 M for the accounting change in the recording of foreign exchange forward contracts and \$36 M for capitalizing cadastral plan expenses.
1997-1998	24	—	(15 421)	(15 397)	Departments and bodies: (\$13 173 M) for recording unrecorded pension plan obligations; (\$6 693 M) for consolidating government enterprises, bodies and special funds; (\$731 M) for the change to the method used to record borrowings; (\$461 M) for recording public sector restructuring measures; and \$5 637 M for recording fixed assets.

(1) As of fiscal 2006-2007, corresponds to the comprehensive income of government enterprises. For 2001-2002 to 2005-2006, corresponded to the foreign exchange translation adjustment, and for 1997-1998 to 1999-2000, corresponded to the surplus of the municipal assessment for fixed assets of the Corporation d'hébergement du Québec.

CONSOLIDATED FINANCIAL STATEMENTS

Statement of responsibility

The Government is responsible for the integrity and objectivity of the consolidated financial statements. These statements are prepared by the Comptroller of Finance for the Minister of Finance under the *Financial Administration Act* (R.S.Q., c. A-6.001, s. 86) and in accordance with the accounting policies disclosed in Note 1. The analysis of the consolidated financial statements contained in Volume 1 is also prepared by the Québec government.

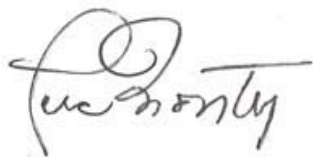

To fulfil its accounting and financial reporting responsibilities, the Government maintains systems of financial management and internal control designed to provide reasonable assurance that transactions are duly authorized by Parliament and properly executed and recorded.

The Comptroller of Finance takes care of government accounting and obtains all the information needed to meet its accounting requirements from government departments, bodies, enterprises and funds.

The Government submits its consolidated financial statements for audit assurance to the Auditor General of Québec who, in his independent auditor's report to the National Assembly, states the nature and scope of his audit as well as his opinion.

The consolidated financial statements are part of the Public Accounts tabled annually in the National Assembly by the Minister of Finance.

On behalf of the Gouvernement du Québec,

Luc Monty
Deputy Minister of Finance

Simon-Pierre Falardeau, CA
Comptroller of Finance

Québec, October 14, 2011

Independent Auditor's Report

To the National Assembly,

Report on the Consolidated Financial Statements

I have audited the accompanying consolidated financial statements of Government of Québec, which comprise the consolidated statement of financial position as at March 31, 2011, the consolidated statements of operations, accumulated deficit, change in net debt and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information included in the notes and the appendices.

Management's Responsibility for the Consolidated Financial Statements

The Minister of Finance is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with Canadian public sector accounting standards and for such internal control as the Minister of Finance determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

My responsibility is to express an opinion on these consolidated financial statements based on my audit. I conducted my audit in accordance with Canadian generally accepted auditing standards. Those standards require that I comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my audit opinion.

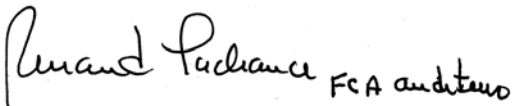

Opinion

In my opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Government of Québec as at March 31, 2011, and the results of its operations, changes in its net debt and its cash flows for the year then ended in accordance with Canadian public sector accounting standards.

Report on other Legal and Regulatory Requirements

As required by the *Auditor General Act* (R.S.Q., chapter V-5.01), I express the opinion that these consolidated financial statements present fairly, in all material respects, the financial position of the Government of Québec as at March 31, 2011, and the results of its operations and the changes for the financial position for the year ended on that date in accordance with the accounting policies of the Government of Québec set out in note 1 to the consolidated financial statements.

Moreover, in accordance with the Act, I report that, in my opinion these accounting policies have been applied on a basis consistent with that of the preceding year.

Notes to consolidated financial statements

1. Significant accounting policies

The Gouvernement du Québec accounts for its financial transactions in accordance with the accounting policies adopted by the Conseil du trésor and described below. The primary source of reference for establishing these policies are the Canadian public sector accounting standards. When necessary, the information presented in these consolidated financial statements is based on estimates and considerable judgment by the Government.

Reporting entity

The Government's reporting entity encompasses the financial transactions of the National Assembly and persons designated by the National Assembly, departments and all the bodies, funds and enterprises under the control of the Government. Control is defined as the power to direct the financial and administrative policies of an entity such that its activities will provide the Government with anticipated benefits or expose it to the risk of loss. The entities of the Government's reporting entity are listed in appendices 1 to 4 of the consolidated financial statements

Fiduciary transactions carried out by the entities mentioned in Appendix 5 are not included in the Government's reporting entity.

Consolidation method

The accounts of the Consolidated Revenue Fund and the other entities included in the Government's reporting entity, with the exception of government enterprises, are consolidated line by line in the financial statements. Accordingly, the accounts are harmonized according to the Government's accounting policies and combined line by line; inter-entity transactions and balances are eliminated.

Investment in government enterprises is accounted for using the modified equity method. According to this method, investments are recorded at cost, which is adjusted annually by the Government's share in the results of these enterprises with an offsetting entry to revenue, and in the other items of their comprehensive income with an offsetting entry to accumulated deficits. The value of the investment is reduced by declared dividends and adjusted by the elimination of unrealized inter-entity gains and losses relating to transactions on assets that remain within the Government's reporting entity. This method requires no harmonization of enterprises' accounting policies with those of the Government.

1. Significant accounting policies (cont'd)

A government enterprise has all of the following characteristics:

- a) it is a separate legal entity that has the authority to enter into contracts in its own name and to go before a court;
- b) it is vested with the financial and administrative power to carry out commercial activities;
- c) its main activity is the sale of goods or the delivery of services to individuals or to organizations not included in the Government's reporting entity;
- d) it may, during the normal course of its operations, pursue its activities and settle its debts using revenue from sources not included in the Government's reporting entity.

Revenue

Revenue is recorded using the accrual method, i.e. in the fiscal year during which the transactions or the events giving rise to the revenue occurred. Revenue not collected at the end of the fiscal year and refunds not yet issued are recorded on the basis of estimates established according to transactions that will take place in the three months following the end of the fiscal year. Revenue that would be too difficult to measure prior to reception is recorded at the time the funds are received. Sums received or receivable in regard to revenue that will be earned in a subsequent year are deferred and presented as deferred revenue.

More specifically:

- Revenue from personal income tax and contributions dedicated to health services is recognized when the taxpayer earned the income subject to tax.
- Revenue from school property taxes is deferred and recognized over the reference period for such taxes.
- Corporate income tax revenue is recorded at the time the funds are received, because amounts receivable or refundable cannot be accurately estimated. Taxable corporate income varies significantly from year to year and the time allowed for filing corporate returns results in that the information cannot be obtained in time to make adjustments to revenue on the closing date of the Government's financial statements. An adjustment is made to account for notices of assessment issued before the end of the fiscal year.
- Revenue from consumption taxes is recognized at the time of the sale of the products or the delivery of the services, after deducting tax credits.

1. Significant accounting policies (cont'd)

- Tax revenue does not take into account estimates concerning taxes due on unreported revenue. These amounts are recorded when assessments are issued following audits or the filing of returns by taxpayers.
- Revenue from duties and permits is recognized when receivable. Where duty or permit revenue is refundable on demand and is linked to clearly identifiable goods and services that the Government must supply to the holder of the duty or the permit, the revenue is deferred and recognized over the reference period of such duty or permit.
- Revenue from user contributions is deferred and recognized when products are sold or services delivered.
- Revenue from tuition fees is deferred and recognized over the duration of the training concerned.
- Transfers from the federal government are recorded as revenue in the fiscal year during which the events giving rise to them occur, provided the transfers were authorized, the eligibility criteria were met and it is possible to make a reasonable estimate of the amounts involved.
- Interest income ceases to be recorded when there is no assurance that the principal or interest will be recovered.

Expenditure

Expenditure includes the cost of goods consumed and services obtained during the fiscal year, including annual depreciation of the cost of fixed assets.

Transfers, whether they are entitlement transfers, transfers relating to shared-cost programs, or grants, are recorded in the fiscal year during which the events that give rise to them occur, insofar as the transfers have been authorized and once the beneficiaries have met the eligibility criteria. The determining factor for recognizing an entitlement transfer is the beneficiary's satisfaction of the eligibility criteria stipulated in a law or a regulation; for a transfer relating to a shared-cost program, it is the incurring of eligible costs by the beneficiary; and for a grant, it is the latter's authorization by the Government.

Debt service interest charges resulting from transactions in foreign currency are translated into Canadian dollars at the rates in effect at the time of the transactions.

1. Significant accounting policies (cont'd)

Financial assets

Short-term investments are recorded at the lesser of cost or market value. Accounts receivable are initially recorded at cost and then brought down to their net recoverable value by means of an allowance for doubtful accounts. The annual change in this allowance is charged to expenditure.

Inventories intended for sale are evaluated at the lesser of cost or net realizable value.

Investment in government enterprises is recorded using the modified equity method.

Long-term investments are recorded at cost.

For loans and other investments with significant concessionary terms, their face value is discounted at the average rate of government borrowings to determine the value of the grant component, which is recognized as a transfer expense at the time the investments are made. The discount on loans and other investments is amortized over their lifetime using the real interest method, and recognized as interest income.

Long-term investments are reduced using valuation allowances. An allowance is recorded for loans and advances where the facts or circumstances point to a future loss. For other long-term investments, an allowance is recorded when a durable loss in value is recognized. The annual change in these allowances is charged to expenditure. The write-off of any investment reduces the cost of investments as well as the valuation allowance relating to such investment. The residual balance is charged to expenditure. The subsequent recovery is recorded as a reduction in expenditure.

Generations Fund

Demand and participation deposits in a particular fund of the Caisse de dépôt et placement du Québec are recorded at cost.

At the time of disposition of participation deposits, the difference between the amount received and the book value of these units established using the average cost method is charged to operations. Where participation deposits suffer a durable loss in value, their book value is reduced to reflect this decline. The reduction is taken into account in the determination of the results for the fiscal year.

The revenue and expenditure of the Generations Fund are recorded according to the Government's accounting policies.

1. Significant accounting policies (cont'd)

Liabilities

Other liabilities

Allowance for losses on guaranteed financial initiatives

Obligations resulting from borrowings and other financial initiatives guaranteed by the Government are recorded on the basis of probable losses. The allowance is established on the balance of the guaranteed financial initiatives reduced by the estimated realizable value of the security and surety obtained. The annual change in the allowance is charged to expenditure.

Probable losses are estimated by grouping financial initiatives into various risk classes and applying an average loss rate to each class, based on past experience and the nature of the initiatives. In the case of enterprises whose Government-guaranteed financial initiatives show an exceptionally high cumulative balance or are characterized by specific features, the estimate of probable losses relating to these initiatives is made using case-by-case analysis, regardless of risk class. Probable losses are revised annually.

Environmental liability

The obligations resulting from the remediation of contaminated land under the Government's responsibility, or probably under its responsibility, are recorded as environmental liabilities as soon as contamination occurs or as soon as the Government is informed. An environmental liability includes the estimated cost of contaminated land management and remediation. The cost evaluation is based on the best information available and is revised annually.

Given the difficulties inherent in evaluating this liability, the Government's obligations, which are recognized until March 31, 2011 for contaminated land existing as at March 31, 2006, are applied against the accumulated deficit.

Pension plans and other employee future benefits

Pension plans

Government pension plans are defined benefit pension plans. Within the context of preparing the Government's financial statements, obligations relating to vested benefits are evaluated using the actuarial projected benefit method prorated on service, according to the most probable assumptions set by the Government with regard, notably, to inflation, interest and employee remuneration. This method has been adjusted, however, to reflect the way in which benefits payable by the Government are accrued by employees.

1. Significant accounting policies (cont'd)

Total cost of plans

The annual cost of vested benefits for all pension plans, including the cost of changes to the plans, and the amortization of adjustments to estimates based on actuarial gains or losses, is charged to expenditure, with an offsetting entry in the retirement plans account, which represents the pension plans liability. Changes to actuarial assumptions are included in the adjustments to estimates based on actuarial gains or losses.

In the case of the Government and Public Employees Retirement Plan (RREGOP), the Civil Service Superannuation Plan (CSSP), the Teachers Pension Plan (TPP), the Pension Plan of Certain Teachers (PPCT) and transfers from the TPP and the CSSP to RREGOP, adjustments to estimates based on actuarial gains or losses are amortized using the straight-line method over a period corresponding to the estimated average length of the remaining active career of participants in these plans as a whole. However, adjustments to estimates based on actuarial gains or losses for the other pension plans are amortized over a period corresponding to the estimated average length of the remaining active career of participants in each plan.

The total cost of the pension plans also includes interest charges on obligations relating to vested benefits, with an offsetting entry to liabilities in the pension plans account.

Retirement Plans Sinking Fund (RPSF) and other pension plan assets

Investments of the Retirement Plans Sinking Fund are valued at an adjusted market value, where the difference between the real return based on market value and the forecast return is amortized over five years.

The annual income of the sinking fund is obtained by applying the rate of return stipulated in the actuarial valuations of the retirement plans to the fund balance. The adjustments recognized annually, arising from actuarial gains and losses attributable to the use of the stipulated rate of return, are amortized using the straight-line method over the estimated average length of the remaining active career of pension plan participants. The amortization of these adjustments is recorded as investment income of the fund.

The RPSF's investment income is subtracted in calculating interest charges on obligations relating to vested benefits.

1. Significant accounting policies (cont'd)

The assets of the pension plan of the Université du Québec and other pension plan assets, as well as the revenue arising from them, are accounted for on the basis of the same accounting policies as those used for the RPSF. However, adjustments are made with regard to the amortization period of the adjustments recognized annually in order to amortize them over the same period as the adjustments to the obligation relating to the vested benefits of the pension plan concerned.

When the adjusted market value of a pension plan's assets is higher than that of its obligations relating to vested benefits, the resulting surplus is capped through a valuation allowance so that the pension plans liability reflects only the future benefit that the Government expects to derive from this surplus. The change in this allowance is recorded as investment income from the assets of the plan concerned.

Other employee future benefits

The long-term obligations arising from other benefits granted to employees are valued using actuarial methods, according to the most likely assumptions determined by the Government. The resulting obligations and corresponding expenditures are recorded on the basis of the method through which employees acquire these benefits, i.e. through services provided or through the occurrence of an event giving rise to employment-related benefits.

The cost of these employee benefits acquired during the year, the cost of changes to the provisions of these benefits, the amortization of adjustments relating to estimates based on actuarial gains and losses and the interest charges on these obligations are charged to expenditure of the fiscal year with an offsetting entry to the "Other employee future benefits" account.

Any fund set up to provide for the payment of obligations relating to these other employee future benefits and the revenue arising from it are accounted for on the basis of the same accounting policies as those used for the RPSF. However, adjustments are made with regard to the amortization period of the adjustments recognized annually in order to amortize them over a period suited to the employee future benefit concerned.

Debts

Borrowings are recorded at the amount received at the time of issue, adjusted by the premium or discount amortization to obtain the amount of principal repayable at maturity. The amortization is calculated using the effective rate for each borrowing.

Issue expenses related to borrowings are deferred and amortized over the term of each borrowing using the straight-line method. The unamortized balance is included in deferred expenses related to debts.

1. Significant accounting policies (cont'd)

Borrowings in foreign currency are translated into Canadian dollars at the rates in effect on March 31.

Foreign exchange gains or losses resulting from the translation of borrowings are deferred and amortized over the remaining term of each borrowing using the straight-line method.

Derivative instruments

The Government uses derivative instruments to manage foreign exchange and interest rate risks related to debts. These instruments are recorded at cost.

Derivative instruments used to manage the foreign exchange risk associated with the repayment of interest and principal on borrowings and with the cash management transactions such risk management entails, including currency swap contracts and foreign exchange forward contracts, are translated into Canadian dollars at the rates in effect on March 31. The components of these instruments, namely, financial assets and liabilities, are offset against one another and shown as "Debts" items.

Interest rate exchanges stemming from interest rate swap contracts used to change exposure to interest rate risk over the long term are reconciled with interest charges for the borrowings with which these swap contracts are associated.

Gains or losses on derivative instruments are deferred and amortized over the term of each contract. However, gains or losses on derivative instruments used to modify the interest rate risk are amortized over the term of the security underlying these instruments.

Sinking Fund

Securities held by the sinking fund are recorded at the amount paid at the time of purchase, adjusted by the premium or discount amortization to obtain the amount of principal receivable at maturity. The amortization is calculated on the basis of the effective rate for each security.

The difference between the book value of a security and the amount received at the time of its disposal is charged to results.

1. Significant accounting policies (cont'd)

Non-financial assets

Land in the public domain and natural resources, such as forests, water and mining resources, which the Government holds by virtue of the fact that they were devolved to the state and not purchased, are not recorded in the Government's consolidated financial statements. Intangible items do not constitute non-financial assets for the Government.

Fixed assets

Fixed assets consist of acquired, built, developed or improved non-financial assets, whose useful life extends beyond the fiscal year and which are intended to be used on an ongoing basis for producing goods or delivering services.

Fixed assets are recorded at cost and depreciated – except for land, which is not depreciated – using a logical and systematic method over a period corresponding to their useful life. Their cost includes financing charges capitalized during their construction, improvement or development. The cost of fixed assets held under capital leases is equal to the present value of minimum payments due. Fixed assets under construction or being developed or improved are not depreciated until they are put into service.

Some fixed assets are acquired under private-public partnership agreements. These agreements are long-term contracts by which the Government involves one or more private partners in designing, realizing and operating a public good, with or without funding from these partners. The fixed asset and the corresponding debt associated with it are accounted for in the “statement of financial position” when the risks and advantages associated with the ownership of the public good are devolved to the Government, for the most part, in accordance with the terms of the agreement.

The cost of a fixed asset acquired under a private-public partnership agreement is equal to the lower of the present value of the cash flows associated with the fixed asset and the fixed asset's fair value. If the cash flows associated with the fixed asset cannot be isolated from those related to its operation, its cost is determined on the basis of its fair value. The fair value of the fixed asset is estimated on the basis of the agreement's specifications.

Works of art and historic properties are not recorded as fixed assets. Their cost is charged to expenditure for the fiscal year during which they are acquired.

1. Significant accounting policies (cont'd)

Fixed assets acquired through donation or for a nominal fee are recorded at their fair value at the time of acquisition with an offsetting entry to deferred revenue, except for land where the offsetting entry is recognized in revenue in the year of acquisition. Contributions for the acquisition of fixed assets, received from organizations outside the reporting entity, are recorded in deferred revenue, with the exception of those intended for the purchase of land, which are recognized in revenue in the year of acquisition. Deferred revenue is amortized in revenue at the same rate as the depreciation of the cost of the corresponding fixed assets.

Inventories

Inventories consist of supplies that are consumed in the normal course of operations during the coming fiscal year(s). These inventories are valued at the lower of cost and net realizable value.

Prepaid expenses

Prepaid expenses represent outlays made before the end of the fiscal year for services the Government will receive during the coming fiscal year(s). These expenses are charged to expenditure when the Government receives the services acquired.

2. Measurement uncertainty

In preparing the consolidated financial statements, the Government has to make estimates and assumptions in order to evaluate and record certain asset, liability, revenue and expenditure items. These estimates are based on the most reliable data and the most probable assumptions available at the time, and involve considerable judgment by the Government. They are revised annually to reflect new information as it becomes available.

By their very nature, estimates are subject to measurement uncertainty. Therefore, actual results may differ from the Government's forecasts.

Estimates are made for certain material consolidated financial statement items:

- Amounts receivable or repayable in regard to federal government transfers may vary because of possible differences between the assumptions made for fiscal and population data and the actual data.
- Obligations relating to pension plans and other employee future benefits may vary because of differences between the economic and demographic assumptions made for actuarial valuation purposes and the actual results.
- The book value of fixed assets may vary because of differences between their estimated useful life and their actual useful life.
- Environmental liabilities related to contaminated land may vary because of differences between estimated management and remediation costs and actual costs.
- The value of certain allowances may vary because of differences between the assumptions made to evaluate the probability of collection and the amount actually collected.

3. Accounting changes

Environmental liability

The updating of obligations stemming from the remediation of contaminated land that existed as at March 31, 2006 and under the Government's responsibility or probably under its responsibility led to a \$1 413-million increase in environmental liabilities.

The impact of this accounting change was recorded and applied retroactively to previous years, with restatement, by adjusting the accumulated deficit as at April 1, 2009 in accordance with the Government's accounting policy for environmental liability.

This increased (in millions of dollars) the following items:

	<u>2011</u>	<u>2010</u>
Other liabilities	1 413	1 413
Accumulated deficit and net debt, beginning of year	1 413	1 413
Accumulated deficit and net debt, end of year	1 413	1 413

4. Income and property taxes

Revenue from income and property taxes is recorded after deducting the following amounts.

Amounts deducted from revenue from income and property taxes

(in millions of dollars)

	2011	2010
Personal income tax		
Refundable tax credits		
Child Support Program	2 124	2 130
Sales tax	544	519
Day care expenses	347	271
Home-support services for seniors	262	232
Informal caregivers	50	45
Education savings	53	57
Work premium	380	377
Home renovation and improvement	18	171
Medical expenses	48	43
Other	53	53
Property tax refunds	353	317
	4 232	4 215
Corporate tax		
Refundable tax credits		
Scientific research and experimental development	825	583
Job creation in a designated region	114	105
Construction of public access roads and bridges	110	156
Cinematographic productions	135	87
Resources	73	128
Reporting of tips	61	54
Salaries paid by a corporation carrying out an activity in a designated site	38	50
Investment	66	38
Multimedia titles	82	75
Salaries paid by a corporation - Cité du multimédia	19	21
E-business	159	122
Other	165	198
	1 847	1 617
	6 079	5 832

5. Duties and permits

Revenue from duties and permits is recorded after deducting the following amounts.

Amounts deducted from revenue from duties and permits

(in millions of dollars)

	<u>2011</u>	<u>2010</u>
Gross revenue	2 204	1 899
Deductions		
Silvicultural work and other forest management activities	120	103
Other	33	45
	<u>153</u>	<u>148</u>
Net revenue	<u>2 051</u>	<u>1 751</u>

6. Federal government transfers to be repaid

(in millions of dollars)

	<u>2011</u>	<u>2010</u>
Equalization and Canada Health and Social Transfer ⁽¹⁾	1 316	1 481
Other programs	<u>2</u>	<u>19</u>
	<u>1 318</u>	<u>1 500</u>

(1) This result included the balance of \$1 189 M (\$1 426 M as at March 31, 2010) of an original amount of \$2 377 M that does not bear interest and is to be repaid over 10 years until 2015-2016. This amount is related to the measures adopted by the federal government in order to offset the decrease in transfers for 2003-2004 and 2004-2005.

7. Pension plans and other employee future benefits

Liability regarding the pension plans and other employee future benefits (in millions of dollars)

	Value before unamortized actuarial gains and losses	Unamortized actuarial gains (losses)	2011	2010
Pension plans				
Obligations relating to vested benefits	80 051	(4 984)	75 067	71 506

	38 775	(9 725)	29 050	29 789
Other employee future benefits				
Obligations relating to accrued rights and benefits	1 314	(92)	1 222	1 238
Funds related to other employee future benefits	(1 109)	(38)	(1 147)	(1 106)
	205	(130)	75	132
	38 980	(9 855)	29 125	29 921

Pension plans

The Government of Québec contributes to several pension plans for its employees. Employees of the public and parapublic sectors, the Members of the National Assembly and the judges of the Court of Québec participate in these plans.

	Estimated number of participants as at December 31, 2011	Number of beneficiaries as at December 31, 2011
Government and Public Employees Retirement Plan (RREGOP)	515 000	199 614
Pension Plan of Management Personnel (PPMP)	28 350	23 434
Teachers Pension Plan and Pension Plan of Certain Teachers (TPP and PPCT)	165 ⁽¹⁾	46 979 ⁽¹⁾
Civil Service Superannuation Plan (CSSP)	75 ⁽¹⁾	22 112 ⁽¹⁾
Superannuation Plan for the Members of the Sûreté du Québec (SPMSQ)	5 500	4 762
Pension Plan of Peace Officers in Correctional Services (PPPOCS)	3 400	1 560
Pension Plan of the Judges of the Court of Québec (PPJCQ)	265	335
Pension Plan for Federal Employees Transferred to Employment with the Gouvernement du Québec (PPFEQ)	215 ⁽²⁾	127 ⁽²⁾
Pension Plan of the Members of the National Assembly (PPMNA)	122	332
Pension plan of the Université du Québec (PPUQ)	8 444	2 909
	561 536	302 164

(1) These plans have not admitted any new participants since July 1, 1973.

(2) This plan has not admitted any new participants since its creation on January 1, 1992.

7. Pension plans and other employee future benefits (cont'd)

These plans are “defined benefit” pension plans, which means that they guarantee participants a set income upon retirement. This income is calculated on the basis of participant’s average income for the best paid years, generally five, and their number of years of service. The portion of benefits accrued prior to July 1, 1982 or, in the case of the PPUQ, prior to January 1, 2005, is usually indexed to the cost of living; the portion of benefits accrued after those dates is partially indexed.

There are two types of pension plans: — cost-sharing pension plans;
— cost-balance pension plans.

Cost-sharing pension plans

In the case of regular service under RREGOP and the PPMP, the Government covers costs at a rate of 50% for years of service accrued since July 1, 1982 and 58.33% (7/12) for years of service accrued prior to that date. The contributions of participants and independent employers¹ are paid into two separate funds at the Caisse de dépôt et placement du Québec.

In the case of the PPPOCS, the Government covers 46% of costs, while participants cover 54%. Participants’ contributions are paid into the Consolidated Revenue Fund.

In the case of the SPMSQ, the Government covers 2/3 of the cost of the plan for years of service accrued since January 1, 2007. Prior to that date, this plan was a cost-balance plan. Since January 1, 2007, the contributions of participants and employers for these years of service have been paid into two separate funds at the Caisse de dépôt et placement du Québec. The Government is not obliged to contribute on a monthly basis; however, its contribution is payable no later than every three years and is determined on the basis of the actuarial valuations required for this purpose by the Minister of Finance.

Cost-balance pension plans

Cost-balance pension plans are plans for which the Government covers the cost, net of contributions paid by participants and independent employers. This is the case of the TPP, the PPCT, the CSSP, the PPJCQ, the PPFEQ, PPMNA and the PPUQ as well as the cost of years of service transferred from the TPP and the CSSP to RREGOP and the PPMP. This is also the case of years of service accrued under the SPMSQ prior to January 1, 2007.

The contributions of participants and independent employers to all of these plans, except the PPUQ and the PPFEQ, are paid into the Consolidated Revenue Fund.

¹ Independent employers are employers who are required to pay contributions under the provisions of the statutes that set up the pension plans.

7. Pension plans and other employee future benefits (cont'd)

Pension plans liability

The pension plans liability is established on the basis of the value of obligations relating to vested benefits for the pension plans as a whole, taking into account the actuarial gains or losses recognized during the actuarial valuations prepared every three years and the extrapolations made between two valuations. These gains and losses are amortized over the estimated average remaining active career of participants, which can vary from 9 to 17 years for the main plans.

In the case of cost-sharing pension plans, only the portion of obligations relating to vested benefits payable by the Government, along with the related assets, is included in the pension plans liability. The only exception is the PPPOCS, for which obligations also include, owing to the deposit of participants' contributions in the Consolidated Revenue Fund, the value of the fund that would have been built up by participants. The pension plans liability also includes the obligations of these plans that relate to organizations not included in the Government's reporting entity, whose responsibility is limited to paying their contributions to these plans.

The obligations of cost-sharing plans payable by participants, as well as participants' actual contributions, are administered separately from those of the Government by the Commission administrative des régimes de retraite et d'assurances (CARRA). Information on these obligations and the net assets available to pay benefits under the plans is presented in the plans' financial statements, which are published by CARRA.

All of the obligations relating to vested benefits under cost-balance pension plans are included in the pension plans liability.

7. Pension plans and other employee future benefits (cont'd)

Breakdown of the pension plans liability (in millions of dollars)

	Value before unamortized actuarial gains and losses	Unamortized actuarial gains (losses)	2011	2010
Obligations relating to vested benefits				
RREGOP				
- regular service	41 378	(2 752)	38 626	35 729
- transferred service	3 066	(141)	2 925	2 951
PPMP				
- regular service	9 017	(703)	8 314	7 415
- transferred service	1 158	(41)	1 117	1 124
TPP and PPCT	13 196	(938)	12 258	12 600
CSSP	4 308	(144)	4 164	4 317
SPMSQ	3 522	(3)	3 519	3 434
PPUQ	2 794	(253)	2 541	2 362 ⁽¹⁾
Other	1 612	(9)	1 603	1 574
	80 051	(4 984)	75 067	71 506
Pension plan assets				
Retirement Plans				
Sinking Fund	(37 784)	(4 481)	(42 265)	(38 200)
PPUQ assets	(2 538)	(223)	(2 761)	(2 597)
Other pension plan assets	(994)	(37)	(1 031)	(1 010) ⁽²⁾
Valuation allowance - PPUQ			—	52 ⁽¹⁾
Valuation allowance - Other pension plan assets	40		40	38 ⁽²⁾
	(41 276)	(4 741)	(46 017)	(41 717)
	38 775	(9 725)	29 050	29 789

(1) Based on the actuarial valuation of the PPUQ in 2010-2011, the value of obligations relating to vested benefits under the plan for 2009-2010 was adjusted upward by \$136 M and the valuation allowance for the PPUQ was reduced by the same amount. The net impact on the retirement plans liability is nil.

(2) Certain data have been reclassified in order to present separately the valuation allowance for other pension plan assets.

7. Pension plans and other employee future benefits (cont'd)

Change in obligations relating to vested benefits (in millions of dollars)

	2011	2010
Obligations, beginning of year	77 058	71 693 ⁽²⁾
Cost of vested benefits	1 898	1 806 ⁽³⁾
Interest on pension plans	4 928	4 714
Benefits paid	(4 561)	(4 490) ⁽³⁾
Plan-to-plan transfers	520	159 ⁽³⁾
Changes to plans	(202)	
Actuarial (gains) losses	392	3 161
Change in obligations relating to certain pension credits ⁽¹⁾	18	15
Obligations, end of year	80 051	77 058

(1) The Government's obligations regarding certain pension credits acquired following the transfer of supplemental pension plans to RREGOP correspond to the actuarial value of these acquired pension credits or to the actuarial value of the assets of the fund created to provide for their payment, whichever is higher.

(2) Based on the actuarial valuation of the PPUQ prepared in 2010-2011, the value of obligations at the beginning of 2009-2010 was adjusted upward by \$136 M.

(3) Certain data have been reclassified in order to reflect separately transactions previously presented on a net basis.

Value of obligations relating to vested benefits for the pension plans as a whole

The value of obligations relating to vested benefits for the pensions plans as a whole at a given date is determined using the actuarial projected benefit method prorated on service, taking into account, among other things, the most probable long-term economic assumptions. The evaluation is done by CARRA actuaries, except in the case of the PPUQ, where it is carried out by a firm of actuaries from the private sector.

Main economic assumptions used (in percent)

	Plans administered by CARRA		PPUQ	
	2011-2020	2021 and thereafter	2011-2020	2021 and thereafter
Yield, net of inflation	4.50	4.50	4.00	4.00
Inflation rate	2.08	2.75	2.08	2.75
Discount rate for obligations related to vested benefits	6.58	7.25	6.08	6.75
Salary escalation rate, net of inflation	0.23	0.50	0.50	0.50

7. Pension plans and other employee future benefits (cont'd)

Changes in these assumptions may lead to a material increase or decrease in the value of obligations relating to vested benefits. The following table, which takes the main assumptions into account, shows the potential impact of a difference of 0.25% in the value of obligations for the four main pension plans (RREGOP – regular service, PPMP – regular service, TPP, CSSP). The table also shows the impact of a one-year difference in life expectancy, considering that, according to current assumptions, the life expectancy of beneficiaries aged 60 is 23.1 years for men and 26.6 years for women.

Impact of changes in the main assumptions on the value of obligations relating to vested benefits as at March 31, 2011

Assumptions	Change	Impact	
		\$M	%
- Yield, net of inflation	- Increase of 0.25%	(1 990)	- 3.1
	- Decrease of 0.25%	2 100	+ 3.2
- Inflation rate	- Increase of 0.25%	(490)	- 0.7
	- Decrease of 0.25%	500	+ 0.8
- Salary escalation rate, net of inflation	- Increase of 0.25%	460	+ 0.7
	- Decrease of 0.25%	(450)	- 0.7
- Life expectancy	- Increase of 1 year	1 260	+ 1.9
	- Decrease of 1 year	(1 400)	- 2.1

Actuarial valuations and subsequent estimates

The value of obligations relating to vested benefits is extrapolated for the period between two actuarial valuations.

The value of these obligations as at March 31 was determined using actuarial valuations dated:

- December 31, 2010 for the PPUQ;
- December 31, 2009 for the PPCT, the SPMSQ and service transferred from the TPP and the CSSP to RREGOP and the PPMP;
- December 31, 2008 for regular service under RREGOP and the PPMP, the TPP, the CSSP and the PPMNA;
- December 31, 2007 for the PPJCQ, the PPFEQ and the Retirement Plan for Senior Officials included in the PPMP;
- December 31, 2006 for the PPPOCS.

7. Pension plans and other employee future benefits (cont'd)

Retirement Plans Sinking Fund

In accordance with the statutes that set up the various pension plans, the Government is not usually required to pay contributions to each pension plan fund.¹ The benefits payable under these government plans are paid out by the Consolidated Revenue Fund.

Under the *Financial Administration Act*² the Minister of Finance may make long-term deposits from the Consolidated Revenue Fund with the Caisse de dépôt et placement du Québec, up to the amount in the non-budgetary pension plans account³, in order to create a sinking fund to provide for the payment of some or all of the benefits under the pension plans.

In December 1999, under an agreement concluded during the renewal of its employees' collective agreements, the Government set the objective that, by 2020, the sums accumulated in the Retirement Plans Sinking Fund (RPSF) would be equal to 70% of the obligations relating to vested benefits under the pension plans. This objective does not take into account obligations under plans¹ covered by specific capitalization agreements.

Assets of the PPUQ and other pension plan assets

The assets of the pension plans consist of the funds of employer contributions to RREGOP, the PPMP and the SPMSQ, the funds associated with pension credits acquired by employees following transfers of supplemental pension plans to RREGOP and the PPUQ and PPFEQ funds. The PPFEQ fund consists of employee contributions, government contributions and sums transferred by the federal government upon the creation of the pension plan.

All the assets of these funds, which were established pursuant to the provisions of the pension plans concerned, are deposited with the Caisse de dépôt et placement du Québec, except for those of the PPUQ, which are administered by a private trustee.

¹ Some of the pension plans are covered by other types of capitalization agreements, namely, the PPUQ, the PPFEQ and the SPMSQ (for years of service accrued after January 1, 2007).

² R.S.Q., c. A-6.001

³ In this case, the non-budgetary account of the pension plans corresponds to the pension plans liability prior to taking the Retirement Plans Sinking Fund into account.

7. Pension plans and other employee future benefits (cont'd)

Change in the adjusted market value of pension plan assets (in millions of dollars)

	2011			2010
	RPSF	PPUQ assets	Other pension plan assets	Total
Adjusted market value, beginning of year	35 191	2 406	982	38 579
Forecast return on investments	2 320	163	34	2 517
Consolidated Revenue Fund payments	2 000			2 000
Contributions paid		99	156	255
Plan-to-plan transfers			505	505
Benefits paid		(79)	(691)	(770)
Actuarial gains (losses)	(1 727)	(51)	(10)	(1 788)
Change in the value of assets relating to certain pension credits ⁽¹⁾			18	18
Adjusted market value, end of year	37 784	2 538	994	41 316

(1) The Government's obligations regarding certain pension credits acquired following the transfer of supplemental pension plans to RREGOP correspond to the actuarial value of these acquired pension credits or to the actuarial value of the assets of the fund created to provide for their payment, whichever is higher.

(2) Certain data have been reclassified in order to reflect separately transactions previously presented on a net basis.

As at March 31, 2011, the respective market values of the RPSF's assets and the other pension plan assets, deposited with the Caisse de dépôt et placement du Québec, were \$35 427 million and \$968 million (\$29 560 million and \$875 million as at March 31, 2010). The market value of PPUQ assets was \$2 466 million as at March 31, 2011 (\$2 196 million as at March 31, 2010).

Investment policy of the RPSF as at March 31

This RPSF is a major asset that is managed by the Caisse de dépôt et placement du Québec according to the investment policy set by the Minister of Finance. This policy provides for investments in a diversified portfolio that includes fixed income securities (e.g. bonds), inflation-sensitive investments (e.g. capital assets, infrastructure) and equity.

The target allocation of RPSF assets is as follows:

RPSF benchmark portfolio (in percent)

	2011	2010
Fixed income	37.25	37.75
Inflation - sensitive investments	13.00	12.10
Equity	46.25	46.65
Other investments	3.50	3.50
	100.00	100.00

7. Pension plans and other employee future benefits (cont'd)

For 2010-2011, the forecast return on the RPSF was 6.46% (6.73% in 2009-2010); the realized return, based on the market value of investments, was 12.72% (15.78% in 2009-2010).

Total cost of pension plans (in millions of dollars)

	2011	2010
Pension costs		
Cost of vested benefits	1 898	1 806 ⁽³⁾
Employee contributions	(74)	(69)
Independent employer contributions	(58)	(57) ⁽³⁾
	1 766	1 680
Changes to plans ⁽¹⁾	(202)	
Amortization of actuarial (gains) losses	959	464
	2 523	2 144
Interest on pension plans	2 636 ⁽²⁾	2 295 ⁽²⁾
Total	5 159	4 439

(1) Under the *Act to amend various pension plans in the public sector* (2010, c. 29), the participants of certain plans may accrue, for each year of service completed as of 2011, a year of service over and above the 35 years of service now used in computing the pension, up to a maximum of 38.

(2) After deducting investment income of \$2 292 M in 2010-2011 (\$2 419 M in 2009-2010) of the RPSF and other pension plan assets. This income took into account the amortization of actuarial gains and losses (negative adjustment of \$275 M; negative adjustment of \$155 M in 2009-2010) and the change in the valuation allowance (positive adjustment of \$50 M; positive adjustment of \$65 M in 2009-2010).

(3) Certain components of the item "Remuneration" presented in Appendix 7 have been reclassified and these reclassifications have affected these two components.

Funding of pension plans

Actuarial valuations for funding purposes for regular service under "cost-sharing" pension plans (RREGOP, PPMP AND PPPOCS)

In accordance with the statutes under which these plans were created, CARRA actuaries are required to prepare, every three years, an actuarial valuation for funding purposes for each of the pension plans in order to determine the rates of contribution for these plans. To that end, the actuaries take legislative provisions and collective agreements into account using the valuation method agreed upon by the parties concerned and economic assumptions that are more conservative than those used to prepare valuations for accounting purposes.

According to these valuations, the Government commitment for funding purposes is calculated as the fund that the Government would have amassed had it been required to pay contributions since 1973 on the same bases as those used to determine the rate of contribution of participants.

7. Pension plans and other employee future benefits (cont'd)

The difference between the amounts determined for the purpose of these valuations and the liability recorded for these three plans represents a non-payable amount that does not have to be entered as a liability of the Government. The recorded liability corresponds to the value of obligations relating to vested benefits under the plans, net of unamortized actuarial gains and losses, as established in the present consolidated financial statements. A number of the Government's labour-management associations submitted an application to the Québec Superior Court requesting that it recognize that this difference constitutes a Government commitment. In July 2004, the ruling handed down by the Québec Superior Court on this application concluded that:

- in every fiscal year since 1973, the Government has disclosed, in an appropriate manner and in accordance with the standards of the Canadian Institute of Chartered Accountants, its financial commitments regarding the sharing of the cost of the Government and Public Employees Retirement Plan (RREGOP), the Pension Plan of Management Personnel (PPMP) and the Pension Plan of Peace Officers in Correctional Services (PPPOCS), as provided in the legislation concerned;
- sharing the cost of financing the pension plans concerned, namely, RREGOP, the PPMP and the PPPOCS, does not commit the Government to using the same actuarial bases as those employed to constitute the pension funds of participating employees, especially since the evidence revealed no risk of a detrimental impact on the pension wealth of each covered participating employee at any time.

The Government's labour-management associations appealed this ruling in August 2004. In January 2006, the Québec Court of Appeal suspended the appeal to allow the labour organizations of employees who participate in these plans to bring a new application before the Québec Superior Court for a declaratory judgment on this subject. An application to this effect was filed by these labour organizations in April 2006. In July 2010, the organizations abandoned the lawsuit they had instituted for the purpose of obtaining a declaratory judgment. The proceedings instituted by the labour-management associations are still pending before the Québec Court of Appeal.

In addition, in fall 2010, the RREGOP Retirement Committee did not mandate CARRA to determine the value of the Government's commitment under RREGOP when it was preparing its actuarial valuations for funding purposes. However, CARRA continues to do such valuations for the PPMP and the PPPOCS.

The value of the PPMP fund was estimated at \$7 190 million at fair value and \$7 780 million at cost as at December 31, 2010, (\$6 114 million at fair value and \$7 396 million at cost as at December 31, 2009). In the case of the PPPOCS, for which the employee contributions were paid to the Consolidated Revenue Fund, the value of the fund that would have been built up by employees and the Government was \$847 million at cost as at December 31, 2010 (\$871 million as at December 31, 2009).

7. Pension plans and other employee future benefits (cont'd)

Other employee future benefits

In addition to the pension plans, the Government sponsors other programs of future benefits for its employees, which provide for the accumulation of sick leave and the payment of survivor pensions. The Université du Québec and its constituent also offer these employees certain lump-sum payments upon early retirement as well as retiree group insurance plans. These programs give rise to long-term obligations for the Government, which generally covers all of the costs.

Accordingly, civil service employees can accumulate the unused sick leave days they are entitled to annually and receive 50% of their value in money in case of termination of employment, retirement or death, up to an amount representing the equivalent of 66 days' salary. In addition, employees can utilize these unused days as fully paid leave days for preretirement.

The *Financial Administration Act* authorizes the Minister of Finance to deposit money with the Caisse de dépôt et placement du Québec, up to an amount equal to the value of its obligation relating to accumulated sick leave in order to build up the Accumulated Sick Leave Fund. The purpose of this fund is to provide for the payment of some or all of the benefits due to employees for unused sick leave.

The survivor pension plan stipulates that a pension is paid to the spouse and dependent children following the death of an eligible person. The plan chiefly covers management and similar personnel in the public and parapublic sectors, accounting for 90% of the insured population. The Government pays amounts into a fund at the Caisse de dépôt et placement du Québec, reserved exclusively for the payment of benefits earned by plan beneficiaries.

Other employee future benefits liability

The Government's obligations regarding employee future benefits, except the survivor pension plan, arise as employees accrue years of service with the Government. The value of these obligations is established using an actuarial method that takes into account the length of the active career of employees. The method also reflects the way that employees earn benefits.

Under the survivor pension plan, an obligation is recognized when the death of an eligible person occurs. The value of the obligations is established using an actuarial method that determines the present value of the pensions then accrued by beneficiaries.

Actuarial gains and losses recognized at the time of the actuarial valuations of the obligations are amortized over the estimated average remaining active career of the employees concerned, except in the case of the survivor pension plan, where they are amortized over the average remaining life expectancy of the beneficiaries.

7. Pension plans and other employee future benefits (cont'd)

Breakdown of the other employee future benefits liability (in millions of dollars)

	Value before unamortized actuarial gains and losses	Unamortized actuarial gains (losses)	2011	2010
Obligations relating to accrued rights and benefits				
Accumulated sick leave	758	(104)	654	672

7. Pension plans and other employee future benefits (cont'd)

Actuarial valuations and subsequent estimates

The value of obligations relating to accrued rights and benefits is extrapolated for the period between two actuarial valuations.

The value of these obligations as at March 31 was determined using actuarial valuations dated:

- March 31, 2010 for accumulated sick leave;
- December 31, 2009 for the survivor pension plan;
- March 31, 2009 for Université du Québec programs.

The value of obligations relating to accrued rights and benefits is estimated using the most likely long-term economic assumptions.

Main economic assumptions used (in percent)

	Accumulated sick leave	Survivor pension plan	Université du Québec programs
Yield, net of inflation	4.50	4.50	—
Inflation rate	2.75	2.75	2.75
Salary escalation rate, net of inflation	0.50	—	0.50
Discount rate for obligations relating to accrued rights and benefits	7.25	7.25	4.50

Change in the adjusted market value of funds relating to other employee future benefits (in millions of dollars)

	2011			2010
	Accumulated Sick Leave Fund	Survivor Pension Plan Fund	Total	Total
Adjusted market value, beginning of year	656	418	1 074	1 029
Forecast return on investments	43	26	69	69
Consolidated Revenue Fund payments		7	7	16
Benefits paid		(33)	(33)	(32)
Actuarial gains (losses)	12	(20)	(8)	(8)
Adjusted market value, end of year	711	398	1 109	1 074

7. Pension plans and other employee future benefits (cont'd)

As at March 31, 2011, the respective market values of the assets of the Accumulated Sick Leave Fund and the Survivor Pension Plan Fund, deposited with the Caisse de dépôt et placement du Québec, were \$760 million and \$365 million (\$677 million and \$346 million as at March 31, 2010).

For 2010-2011, the forecast returns on the assets of the Accumulated Sick Leave Fund and the Survivor Pension Plan Fund both amounted to 6.50% (6.75% in 2009-2010); the respective realized returns, based on the market value of investments, were 12.26% and 13.21% (14.63% and 15.88% in 2009-2010).

Total cost relating to other employee future benefits (in millions of dollars)

	2011				2010
	Accu- mulated sick leave	Survivor pension plan	Université du Québec programs	Total	Total
Cost of other employee future benefits					
Cost of accrued rights and benefits	51	11	11	73	77
Amortization of actuarial (gains) losses	8	(1)		7	(2)
	59	10	11	80	75
Interest on other employee future benefits	9 ⁽¹⁾	(1) ⁽²⁾	8	16	12
Total	68	9	19	96	87

(1) After deducting Accumulated Sick Leave Fund investment income of \$43 M (\$41 M in 2009-2010).

(2) After deducting Survivor Pension Plan Fund investment income of \$25 M (\$26 M in 2009-2010), which takes into account the amortization of actuarial gains and losses related to this fund (negative adjustment of \$2 M in 2010-2011; negative adjustment of \$2 M in 2009-2010).

8. Risk management and derivative instruments

To meet the financial requirements arising from its operations and investment activities and from the repayment of borrowings that are maturing, the Government has provided itself with an annual financing and debt-management program targeting Canadian and international financial markets.

Participation in these markets involves various types of risk. Therefore, the Government devises risk-management strategies using the different derivative instruments at its disposal.

Foreign exchange risk

Foreign exchange risk is the risk that the cash flows needed to pay the interest and repay the principal on loans in foreign currency will vary according to exchange market fluctuations. To manage this risk, the Government uses derivative instruments such as currency swap contracts and foreign exchange forward contracts. The purpose of such contracts is to exchange cash flows from one currency to another. These contracts mature at various dates until 2037.

After taking into account derivative instruments used to manage foreign exchange risk, the structure of the debt as at March 31, 2011 was as follows: 99.3% in Canadian dollars, 0.2% in yen, 0.4% in Swiss francs and 0.1% in euros (as at March 31, 2010: 96.7% in Canadian dollars, 1.3% in yen, 1.3% in Swiss francs and 0.7% in euros). These percentages are calculated on the basis of the Government's gross debt¹. A change of 1.0% in the Canadian dollar in relation to foreign currencies would lead to a change of \$13 million in the gross debt¹ and \$3 million in debt service.

For the 2010-2011 fiscal year, debt service takes into account foreign exchange gains of \$7 million (foreign exchange losses of \$16 million for fiscal 2009-2010).

Interest rate risk

Interest rate risk is the risk that debt service will vary according to interest rate fluctuations. To reduce its exposure to interest rate risk, the Government uses interest rate swap contracts or other types of derivative instruments. Interest rate swap contracts make it possible to exchange payments of interest at fixed rates for payments of interest at variable rates or vice versa on the basis of a reference par value.

After taking into account derivative instruments used to manage interest rate risk, the structure of the debt as at March 31, 2011 was as follows: 79.2% at fixed interest rates and 20.8% at variable interest rates (as at March 31, 2010: 72.1% at fixed rates and 27.9% at variable rates). These percentages are calculated on the basis of the Government's gross debt¹.

¹ Gross debt including advance borrowings.

8. Risk management and derivative instruments (cont'd)

The fixed-rate debt is the debt that will not mature, and whose rates will not change, over the coming year.

Credit risk

Credit risk is the risk that a counterparty will default on its contractual obligations. To protect itself from such a risk within the scope of derivative instrument transactions, the Government has adopted a credit risk management policy that limits potential counterparty losses.

A credit limit is set for each counterparty based mainly on its credit rating. When this limit is exceeded, a process is implemented to ensure that the amounts owed by the counterparty concerned fall within the limits set.

The Government deals with major financial institutions whose credit rating is equal to or higher than its own by using as a reference the ratings granted by major rating agencies. As at March 31, 2011, 99.8% of the derivative instrument portfolio was associated with counterparties whose credit rating with at least one of these agencies was equal to or higher than that of the province of Québec.

Liquidity risk

Liquidity risk is the risk that the Government will not be able to meet its financial commitments over the short term. To offset this risk, the Consolidated Revenue Fund has lines of credit totalling C\$1 165 million with various Canadian banking institutions. As at March 31, 2011, the outstanding balance on these lines of credit was \$64.6 million.

In addition, the Consolidated Revenue Fund has concluded credit agreements totalling U.S.\$3 500 million with a Canadian and international banking syndicate. There were no transactions under these credit agreements in fiscal 2010-2011.

9. Debts

Debts by currency (in millions of dollars)

Currency	2011			2010

(1) The Government held \$3 977 M in securities as at March 31, 2011 (\$3 399 M as at March 31, 2010), i.e. \$3 569 M (\$2 055 M as at March 31, 2010) in sinking funds relating to borrowings, \$269 M (\$1 221 M as at March 31, 2010) in short-term investments, \$92 M (\$83 M as at March 31, 2010) in long-term investments and \$47 M (\$40 M as at March 31, 2010) in investments in government enterprises.

(2) For 2010 and 2011, other currencies include the pound sterling, the Mexican peso, the Australian dollar, the New Zealand dollar and the Hong Kong dollar.

(3) Payments to the sinking funds relating to borrowings stem from commitments made by the Government in contracts concluded when the borrowings were issued. These sinking funds were associated with \$11 615 M in debts as at March 31, 2011 (\$13 068 M as at March 31, 2010). They will be used to repay \$4 971 M (\$4 723 M as at March 31, 2010) of the debt in Canadian dollars and \$936 M (\$871 M as at March 31, 2010) of the debt in U.S. dollars.

The debts are broken down by currency and category in Appendix 17.

9. Debts (cont'd)

Weighted average interest rate (in percent)

	2011	2010
In Canadian dollars	4.45	4.35
In U.S. dollars	4.91	4.92
In yen	3.55	3.52
In euros	4.52	4.52
In Swiss francs	2.97	2.97
Global	4.32	3.90

Note: The interest rate for each currency corresponds to the weighted average effective rate on short- and long-term borrowings in effect as at March 31. The global rate also includes the impact of interest rate and currency swap contracts.

Debt repayment schedule (in millions of dollars)

Maturing on March 31 ⁽¹⁾	In Canadian dollars ⁽²⁾	In U.S. dollars ⁽²⁾	In yen	In euros	In Swiss francs	Other currencies	Total
2012	21 803	(200)					21 603

	63 949	(123)	46	(8)	37	—	63 901
2017-2021	42 795	771	145	(18)	394	(1)	44 086
2022-2026	8 718	(443)			213		8 488
2027-2031	5 606	(113)	188	152			5 833
2032-2036	8 240						8 240
2037 and thereafter	23 081						23 081
	152 389	92	379	126	644	(1)	153 629

(1) This schedule takes into account, for 2012, the repayment of \$3 317 M in Treasury bills and \$6 147 M in short-term borrowings. In regard to savings products redeemable on demand, the schedule provides for the repayment of \$1 340 M in 2012, \$862 M in 2013, \$863 M in 2014, \$571 M in 2015, \$410 M in 2016, \$2 685 M in 2017-2021 and \$13 M in 2022-2026.

(2) This schedule takes into account contributions from the sinking funds relating to borrowings, which will be used to repay \$4 971 M of the debt in Canadian dollars and \$936 M of the debt in U.S. dollars.

9. Debts (cont'd)

Repayment of debts by the sinking funds relating to borrowings (in millions of dollars)

Maturing on March 31	In Canadian dollars	In U.S. dollars	Total

10. Fixed assets

Fixed assets are recorded at cost. They are depreciated on a straight-line basis over their useful life.

Category	Useful life
Buildings⁽¹⁾ <i>(Institutional and operations buildings, leasehold improvements)</i>	10 to 50 years
Facilities⁽¹⁾ <i>(Organization and development of natural spaces: land, parks, forests, watercourses, etc.)</i>	5 to 20 years
Complex networks⁽²⁾ <i>(Road, maritime and air transportation infrastructures, natural resource development networks, dams and other large structures, etc.)</i>	10 to 60 years
Equipment⁽¹⁾ <i>(Transport vehicles, machinery, furniture, data processing and office automation equipment, specialized medical and educational equipment, etc.)</i>	3 to 30 years
Development of data processing systems <i>(Design, production and implementation of data processing systems, including the cost of equipment and software acquired for this purpose)</i>	5 to 10 years

(1) These categories include fixed assets rented under capital leases.

(2) Except for certain Laval metro infrastructures that are depreciated on a straight-line basis over a period of 100 years.

Works of art and historic properties consist mainly of paintings, sculptures, drawings, prints, photographs, films and videos and their cost is charged to expenditures of the fiscal year in which they are acquired.

Fixed assets by category

(in millions of dollars)

	Land	Buildings	Facilities	Complex networks	Equipment	Development of data processing systems	2011 Total	2010 Total
Cost	1 940	35 950	707	29 196	13 201	3 888	84 882	77 969
Accumulated depreciation		(15 641)	(285)	(11 819)	(8 313)	(2 073)	(38 131)	(36 141)
Net book value	1 940	20 309	422	17 377	4 888	1 815	46 751	41 828

Fixed assets are broken down in Appendix 18.

11. Contractual obligations

As part of its operations, the Government concluded various long-term agreements that gave rise to the following contractual obligations.

Contractual obligations by category (in millions of dollars)

	2011	2010
Transfers		
Funding for the acquisition of fixed assets ⁽¹⁾	13 132	10 649
Agreements ⁽²⁾	10 801	9 633
	23 933	20 282
Minimum undiscounted payments under operating leases	3 296	3 089
Acquisition of fixed assets ⁽³⁾	5 787	5 204
Supplies of goods and services ⁽³⁾	6 712	4 345 ⁽⁵⁾
Pledged loans and investments	940	912
Other	278	327
	40 946 ⁽⁴⁾	34 159 ⁽⁴⁾

(1) In addition to this amount, the Government covers, through transfer payments, interest related to the funding of these fixed asset acquisitions.

(2) In addition to this amount, the Government covers, through transfer payments, interest related to the funding of certain agreements totalling \$141 M (\$149 M as at March 31, 2010).

(3) The contractual obligations related to the acquisition of fixed assets and the supply of goods and services included an amount of \$7 228 M (\$3 538 M as at March 31, 2010) stemming from private-public partnership agreements. In addition to this amount, the Government covers financing costs related to fixed asset acquisitions arising from private-public partnership agreements.

(4) Contractual obligations in foreign currency are presented at their equivalent in Canadian dollars at the rates in effect on March 31 and take foreign exchange forward contracts into account.

(5) Certain 2010 data have been revised to present the contracts that respect the conditions of a contractual obligation.

11. Contractual obligations (cont'd)

Schedule of contractual obligations (in millions of dollars)

Maturing on March 31	Transfers - Funding for the acquisition of fixed assets	Transfers - Agreements	Operating leases	Acquisition of fixed assets ⁽¹⁾	Supplies of goods and services	Pledged loans and investments	Other	Total
2012	1 767	2 232	493	3 440	1 182	556	153	9 823
2013	1 451	1 518	429	1 322	451	207	46	5 424
2014	1 573	1 125	377	446	213	95	23	3 852

	7 345	5 445	1 912	5 632	2 157	930	248	23 669
2017-2021	4 004	1 217	887	39	666	9	14	6 836
2022-2026	841	1 080	323		705		3	2 952
2027-2031	376	649	135		821			1 981
2032-2036	168	475	14		919			1 576
2037 and thereafter	8	1 327	24		1 432	1		2 792
	12 742	10 193	3 295	5 671	6 700	940	265	39 806
No fixed maturity date	390	608	1	116	12		13	1 140
	13 132	10 801	3 296	5 787	6 712	940	278	40 946

(1) An agreement concluded with the federal government in March 2011 provides that the federal government will contribute to fixed asset acquisition costs covered by the Québec government under a private-public partnership. In accordance with this agreement, the total federal contribution will amount to \$705 M, including an amount of \$59 M recognized as at March 31, 2011. The contractual obligations shown in the above schedule have been reduced by the \$646 M balance of the federal government contribution, i.e. by \$323 M in 2012 and by \$323 M in 2013

Contractual obligations with regard to transfers are broken down in Appendix 19.

12. Contingencies

- A) Under its various financial assistance programs, the Government has guaranteed borrowings and other financial initiatives by third parties totalling \$10 597 million as at March 31, 2011 (\$10 581 million as at March 31, 2010). These guaranteed financial initiatives are summarized in Appendix 20.
- B) A number of claims have been instituted against the Government, which is also involved in legal proceedings before the courts. These different disputes result from breaches of contract and damages suffered by individuals or property. In some cases, the amounts claimed are mentioned; in others, no mention is made of them. Claims for which an amount has been established total \$994 million, after deducting the allowances taken by the Government in this regard. Since the outcome of these disputes is uncertain, the Government cannot determine its potential losses. The Government records an allowance for a given claim under “Accounts payable and accrued expenses” only once it appears likely that the claim will give rise to a disbursement and the amount payable can be reasonably estimated.
- C) Some of Québec's Aboriginal communities have instituted legal proceedings involving \$6 050 million in damages and interest against the Government for land claims, the recognition of certain ancestral rights and other related questions. These files are at different stages (some proceedings being currently suspended or inactive) and should eventually be resolved through negotiations, rulings or the abandonment of proceedings by applicants. Since the outcome of these files is uncertain, the Government cannot determine its potential losses.
- D) Since 2006-2007, the Government has recorded an environmental liability for the cost of remediating contaminated land under its responsibility or likely to come under its responsibility to the extent that the amount can be estimated.

A survey of contaminated lands was conducted for this purpose. As at March 31, 2011, \$3 169 million was recorded to “Other liabilities” for the 2 401 properties inventoried. Different methods are used to estimate remediation and management costs. The amount estimated for each file has been increased to take into account the degree of precision of the method used. For example, the environmental liability recorded as at March 31, 2011 takes into account an increase of \$1 001 million in costs (\$1 007 million as at March 31, 2010).

In some cases, the probability that the Government will have to cover the remediation cost could not be established. In others, the value of the costs it will have to assume could not be estimated. Given the difficulties inherent in evaluating this liability, the Government's obligations, which have been recognized until March 31, 2011 for contaminated land existing as at March 31, 2006, have been posted to accumulated deficits, in accordance with the accounting policy.

14. Asset-backed term notes (ABTNs)

On January 21, 2009, an agreement was concluded between the Pan-Canadian Investors Committee and protection buying banks on the restructuring of asset-backed commercial paper (ABCP) issued by third parties. This ABCP was replaced by longer term notes, or asset-backed term notes (ABTN). This agreement also led to the creation of three new trusts called “master asset vehicles” (MAV 1, MAV 2 and MAV 3).

ABTNs are securities backed by a range of financial instruments, whose maturities better match those of the underlying assets. The underlying assets for MAV 1 and MAV 2 are basically credit default swaps, while MAV 3 contains traditional assets such as commercial or residential mortgage debts.

As at March 31, 2011, ABTNs with a face value of \$376 million (\$397 million as at March 31, 2010) and a net value of \$284 million (\$276 million as at March 31, 2010) were held by:

- certain line-by-line consolidated bodies, for a total of \$246 million (\$256 million as at March 31, 2010);
- government enterprises, for a total of \$130 million (\$141 million as at March 31, 2010).

(1) Certain entities in the Government's reporting entity hold bank-sponsored ABTNs that were issued by financial-institution-sponsored trusts. These ABTNs were also restructured in 2008, outside the Pan-Canadian Investors Committee restructuring plan.

14. Asset-backed term notes (ABTNs) (cont'd)

ABTNs were also held in the form of participation units in funds entrusted to the Caisse de dépôt et placement du Québec (CDPQ). On January 1, 2010, the CDPQ created a specialized ABTN portfolio and, at the same time, all the assets and liabilities related to third-party and bank-sponsored ABTNs were transferred from the specialized bond portfolio to this new specialized portfolio. Entities in the Government's reporting entity do not hold these ABTNs per se.

Generations Fund	0.5%	55	57	38	34
Other	0.9%	107	111	75	67
		<u>2 693</u>	<u>2 792</u>	<u>1 878</u>	<u>1 672</u>

In addition to the amounts invested in the ABTNs that it presents in its financial statements, the CDPQ also mentions contingencies stemming from the guarantees it issued as part of the restructuring efforts. The share of these guarantees allocated to participation units held by entities in the Government's reporting entity amounted to \$1 400 million as at March 31, 2011 (\$1 468 million as at March 31, 2010).

Establishing the fair value of ABTN securities

Since there was no active market as at March 31, 2011 for ABTN securities issued in the wake of the restructuring efforts, entities in the Government's reporting entity that held such securities established fair values for the various types of securities using a discounted cash flow model. These valuations take into account specific aspects of the restructuring plan and use, as much as possible, observable market data such as interest rates and credit quality and price as at March 31, 2011. The calculations are based partially on assumptions that are not supported by prices or rates observed on the market. The main assumptions used in the model are related to the default rates on the underlying assets, the loss rates associated with each default, ABTN returns and discounted cash flow rates.

14. Asset-backed term notes (ABTNs) (cont'd)

The value of ABTNs held by the CDPQ and issued by MAV 2 and MAV 3 has been determined using a similar method. The CDPQ used a different method for its MAV 1 ABTNs and certain other restructured ABTNs, but the results are consistent with those obtained by the entities in the Government's reporting entity.

Impact on the Government's results as at March 31, 2011

ABTNs of entities in the Government's reporting entity

Following the evaluation, the Government recognized, in its results for the year ending March 31, 2011, valuation gains of \$18 million, broken down as follows:

- a valuation loss of \$3 million (\$5 million in 2009-2010) in regard to investments made by certain line-by-line consolidated bodies;
- a valuation gain of \$21 million (valuation loss of \$1 million in 2009-2010) related to investments made by government enterprises, which increased the Government's revenue from these enterprises.

Taking the impact of write-offs into account, the accumulated total valuation losses recorded as at March 31, 2011 amounted to \$92 million (\$121 million as at March 31, 2010).

CDPQ participation units

As for the ABTNs held by entities in the Government's reporting entity, in the form of participation units in the funds entrusted to the CDPQ, valuation losses will be recognized in the Government's operations, where applicable, in accordance with its accounting policies. Accordingly, \$44 million was recorded in the Government's results in regard to these losses in 2010-2011 (\$26 million in 2009-2010).

Measurement uncertainty

The current value of ABTNs may vary in relation to their definitive value in subsequent periods particularly because of changes to the main assumptions used for discount rates, credit spreads, anticipated returns, the credit risk of underlying assets and the value of commitments and guarantees.

15. Comparative figures

Certain comparative figures for 2010 were reclassified for consistency with the presentation adopted in 2011.

Total expenditure	<u>81 658</u>	<u>80 090</u>	<u>76 566</u>

(1) Based on the data presented in the 2010-2011 Budget of the Ministère des Finances du Québec on March 30, 2010, after reclassification of the data related to the measures of the plan to restore fiscal balance, for consistency with the presentation of the actual results.

(2) This operating expenditure included an amount of \$2 878 M (\$2 663 M in 2010) related to the depreciation of fixed assets.

(3) The interest charge on the debt included an amount of \$18 M related to the amortization of deferred foreign exchange gains (\$1 M as at March 31, 2010 related to the amortization of deferred foreign exchange losses).

(4) Certain 2010 financial data have been reclassified mainly between the category "Transfer - Remuneration" and the category "Remuneration".

APPENDIX 8

Short-term investments
AS AT MARCH 31, 2011

(in millions of dollars)

	<u>2011</u>	<u>2010</u>
Treasury bills	38	89
Notes	2 016	219

Consolidation adjustments ⁽⁴⁾		28	28	26
Total	836	22 323	23 159	22 609

(1) Equity value was determined on the basis of audited financial statements as at March 31, 2011.

(2) Equity value was determined on the basis of audited financial statements as at December 31, 2010 and adjusted on the basis of interim results as at March 31, 2011.

(3) Loans and advances to Hydro-Québec bore interest at a rate of 1.00% and matured in June 2011; those to IQ FIER inc. do not bear interest and mature between December 2017 and December 2021; those to Loto-Québec bear interest at rates of 1.55% to 4.12% and mature between June 2011 and December 2020; and those to Capital Financière agricole inc. bore interest at rates of 1.25% to 1.30% and matured in April 2011.

The value of maturing loans and advances will be \$340 M in 2012, \$100 M in 2015, \$75 M in 2016, \$297 M in 2017-2021 and \$24 M in 2022 and thereafter.

(4) Adjustments to equity value stem from the elimination of unrealized gains and losses on transactions with entities in the Government's reporting entity.

(5) The impact of the accounting changes applied to previous years is explained under the heading "Restatements by government enterprises" in this appendix.

(6) Under the *Real Estate Brokerage Act* (R.S.Q., c. C-73.2), the Fonds d'indemnisation du courtage immobilier was assigned to an entity not included in the Government's reporting entity for nil consideration on May 1, 2010.

(7) Since April 1, 2011, the activities of the Société générale de financement du Québec and those of IQ FIER inc. and IQ Immigrants Investisseurs inc. have been integrated with those of a new entity, Investissement Québec, established under the *Act respecting the amalgamation of the Société générale de financement du Québec and Investissement Québec* (2010, c. 37). As of that date as well, the activities of Investissement Québec have been split between the new entity and the Economic Development Fund.

(1) On the basis of audited financial statements as at March 31, 2011.

(2) On the basis of audited financial statements as at December 31, 2010.

(3) The percentage of the Government's investment in this enterprise is 90.10%.

(4) The impact of the accounting changes applied to previous years is explained under the heading "Restatements by government enterprises" in this appendix.

(5) The adjustment in the enterprises' surplus stems from taking into account the interim results as at March 31, 2011 of enterprises whose fiscal year-end differs from that of the Government (decrease of \$8 M), contributions by Loto-Québec to entities in the Government's reporting entity and charged to its shareholders' equity (decrease of \$91 M) and the elimination of unrealized gains and losses on transactions with entities in the Government's reporting entity (increase of \$2 M).

(6) The adjustment in the enterprises' other comprehensive income items stems from the interim results as at March 31, 2011 of enterprises whose fiscal year-end differs from that of the Government.

2011									2010 (restated) ⁽⁴⁾

								1 598 ⁽⁷⁾	1 329 ⁽⁷⁾
								22 323	21 922

(7) The adjustment in the enterprises' net equity stems from the interim results as at March 31, 2011 of enterprises whose fiscal year-end differs from that of the Government, which led to an increase of \$1 570 M (increase of \$1 303 M in 2010), and from the elimination of unrealized gains and losses on transactions with entities in the Government's reporting entity, which led to an increase of \$28 M (increase of \$26 M in 2010).

(8) The Government guarantees the corporation's borrowings contracted in various currencies. The net value of these borrowings stood at \$38 781 M (\$37 289 M as at March 31, 2010). The Government granted a financial guarantee of \$685 M (\$685 M in 2010) for Gentilly-2, for which Hydro-Québec set up a trust of \$70 M (\$60 M in 2010).

(9) As at December 31, 2010, debts and other liabilities totalling \$63 M (\$90 M in 2009) were guaranteed by various types of security on accounts receivable, inventories and hypothecs on the universality of property, whose book value totalled \$292 M at that date (\$420 M in 2009).

(10) Debts with the Québec government totalled \$636 M. This amount excluded a short-term borrowing of \$200 M contracted by Hydro-Québec with the Government after the end of its fiscal year.

(11) The Government guarantees payment of the principal on these debts.

(1) The amounts repaid correspond to the amortized cost as determined using the effective interest rate method.

(2) The schedule was drawn up on the basis of the repayments provided for under the different contracts, whereas these enterprises evaluate their debts at amortized cost in their audited financial statements using the effective interest rate method.

(3) Since the fiscal year of these enterprises ends on a different date from that of the Government, the repayments for fiscal 2011-2012 presented in the above schedule cover the period from January 1 to December 31, 2011. This is also the case of the repayments for subsequent years.

Investment in government enterprises (cont'd)
AS AT MARCH 31, 2011

Restatements by government enterprises

Hydro-Québec

In 2010, Hydro-Québec recognized obligations related to the dismantling of thermal generating stations. These obligations were recognized retroactively, with restatement of previous years, resulting in a \$95-million decrease in retained earnings as at April 1, 2010 (\$87-million decrease as at April 1, 2009) and a roughly equivalent increase in fixed asset retirement obligations. The recognition of these obligations did not have a material impact on the corporation's results for the period from April 1, 2010 to March 31, 2011 or the previous period.

The Government thus reduced its investment in this enterprise by \$95 million as at April 1, 2010, with restatement of its consolidated statement of financial position for the previous fiscal year. However, since the impact on the 2009-2010 results was negligible, revenue from government enterprises was not restated.

Société générale de financement du Québec

For its fiscal year starting January 1, 2011, the Société générale de financement du Québec has to use another basis of accounting in preparing its financial statements, namely, International Financial Reporting Standards (IFRS). The corporation has applied the accounting changes resulting from this change in basis of accounting retroactively, with restatement of the previous fiscal year, except in the case of certain changes that were applied prospectively in compliance with the exemptions for retroactive application allowed by IFRS. The retroactive application of the accounting policies resulted in a \$164-million reduction in the corporation's equity as at January 1, 2010. For the three-month period ended March 31, 2010, these changes led to a \$6-million increase in the corporation's global result.

The Government thus reduced its investment in this enterprise by \$158 million as at April 1, 2010. For fiscal 2010-2011, the adoption of this new basis of accounting by this corporation increased revenue from government enterprises by \$116 million as well as the value of the other items of their comprehensive income by \$163 million resulting in an increase of \$47 million of the Government's accumulated deficits. The data for the previous year were not restated, since the information needed to determine the impact of these accounting changes for the period prior to January 1, 2010 could not be made available with reasonable effort.

Investment in government enterprises (cont'd)

AS AT MARCH 31, 2011

Restatements by government enterprises (cont'd)

Total impact

(in millions of dollars)

These restatements increased (decreased) the following items:

	2011	2010
Revenue		
Revenue from government enterprises	116	—
Annual deficit	(116)	—
Investment in government enterprises	(300)	(95)
Accumulated deficit and net debt, beginning of year	253	95
Other items of the comprehensive income of government enterprises	163	—
Accumulated deficit and net debt, end of year	300	95

Main contractual obligations of enterprises

Hydro-Québec

Hydro-Québec has provided for capital and intangible investments of about \$4.2 billion for the 2011 calendar year (\$4.5 billion in 2010).

The corporation has made a commitment to Churchill Falls (Labrador) Corporation Limited to buy almost all of the power produced by the Churchill Falls generating station, which has a rated capacity of 5 428 megawatts. This contract, which expires in 2016, will be renewed automatically for a further 25 years, according to the terms and conditions already agreed upon. A contract guaranteeing the availability of 682 megawatts of additional power until 2041 for the November 1 to March 31 winter period has also been concluded with this enterprise.

As at December 31, 2010, the corporation was committed under 120 contracts to purchasing electricity from other producers, for an installed capacity of roughly 5 674 megawatts. It plans to purchase about 17 terawatt-hours of energy annually over the terms of these contracts, which extend to 2045. Most of the contracts include renewal clauses.

Investment in government enterprises (cont'd)
AS AT MARCH 31, 2011

Main contractual obligations of enterprises (cont'd)

Hydro-Québec (cont'd)

Taking into account electricity purchase contracts as a whole, the corporation plans to make the following minimum payments, in millions of dollars, over the next five years:

	<u>December 31</u>
2011	738
2012	1 058
2013	1 289
2014	1 467
2015	1 598
Total	<u><u>6 150</u></u>

IQ Immigrants Investisseurs inc.

During the normal course of its activities, IQ Immigrants Investisseurs inc. concluded agreements that gave rise to contractual obligations of \$158 million (\$149 million in 2010) for non-refundable financial contributions whose payment has not been authorized. This amount does not necessarily represent future cash requirements, as some of these contractual obligations may be cancelled before they give rise to disbursements.

IQ FIER inc.

During the normal course of its activities, IQ FIER inc. concluded investment agreements that gave rise to contractual obligations of \$77 million (\$102 million in 2010). This amount does not necessarily represent future cash requirements, as some of these contractual obligations will expire or may be cancelled before they give rise to disbursements.

Société générale de financement du Québec

During the normal course of its activities, the Société générale de financement du Québec was committed, as at March 31, 2011, to acquiring tangible assets and purchasing services and raw materials aggregating \$23 million over the next few years (\$37 million as at December 31, 2009). The corporation was also committed to subscribing for long-term investments worth \$48 million at that date, in addition to those recorded as short- and long-term liabilities in its statement of financial situation.

APPENDIX 10

Investment in government enterprises (cont'd)
 AS AT MARCH 31, 2011

Main contractual obligations of enterprises (cont'd)

Various enterprises

Certain government enterprises were committed, as at March 31, 2011, to making minimum undiscounted payments totalling \$510 million (\$488 million in 2010) under long-term contracts and leases.

Schedule of enterprises' contractual obligations under long-term contracts and leases
 (in millions of dollars)

	<u>Total</u>
2012	75
2013	69
2014	62
2015	57
2016	50
	<u>313</u>
2017-2020	197
Total	<u><u>510</u></u>

Some enterprises contracted various other commitments during the normal course of their activities. These commitments, totalling \$64 million (\$84 million in 2010), are authorized commitments that had not been disbursed as at March 31, 2011. Some of them may not be paid if the events do not take place.

Main contingencies of enterprises
Hydro-Québec

Hydro-Québec provided the purchasers of its investments with guarantees in respect to contingent tax liabilities and certain other customary representations. These guarantees, for which no liability was recognized, will be in effect until the applicable limitation periods expire, i.e. up to June 30, 2013.

In accordance with the terms and conditions for the issue of certain debt securities outside Canada, the corporation has undertaken to increase the interest paid to non-residents if changes are made to Canadian tax legislation concerning tax on the income of non-resident persons. The corporation is unable to estimate the maximum amount it could be required to pay. If such an amount becomes payable, the corporation would have the option of repaying most of the securities in question.

Investment in government enterprises (cont'd)
AS AT MARCH 31, 2011

Main contingencies of enterprises (cont'd)

Hydro-Québec (cont'd)

As at December 31, 2010, the amortized cost of the debt concerned was \$4 223 million (\$4 298 million as at December 31, 2009).

Société générale de financement du Québec

During the normal course of its activities, this corporation provided significant guarantees to third parties as follows:

- Under the terms of its credit agreements, the corporation undertook to indemnify the holders of U.S. indebtedness in the event of changes in the laws with regard to tax withholdings. These indemnification agreements will be in effect until the expiry of the credit agreements and do not contain any limits. Given the nature of these agreements, the corporation cannot estimate the maximum payment it may have to make to the holders. The corporation did not recognize an amount on its consolidated statement of financial position for these indemnification agreements.
- When an enterprise is sold in whole or in part, in addition to any potential indemnification arising from the failure to execute restrictive clauses or from non-compliance with a declaration of guarantee, the corporation may agree to give a guarantee against any claim resulting from past activities. In general, the terms and conditions and amount of such indemnification are limited by agreement. Given the nature of these indemnification agreements, the corporation cannot estimate the maximum payment it may have to make to the indemnified parties. The corporation did not recognize an amount on its consolidated statement of financial position for these potential indemnifications.

(1) Investments with municipalities and municipal bodies bear interest at rates of up to 10.50%. Loans to students bear interest at rates of 3.50% to 14.88%. Investments with enterprises, universities not included in the reporting entity, non-profit and fiduciary organizations and other organizations bear interest at rates of up to 6.25%, except for enterprise loans, which bear interest at rates of up to 15.00%.

(2) Guarantees received for loans and advances amounted to \$296 M (\$393 M as at March 31, 2010). Loans to municipal bodies were secured by real estate mortgages.

(3) Loans and advances included, among other things, loans with special repayment clauses based on royalties, for a total of \$402 M (\$323 M as at March 31, 2010).

(4) The grant portion related to long-term investments with significant concessionary terms reduced the value of these investments by \$303 M (\$316 M as at March 31, 2010).

(5) Loans and advances to universities not included in the Government's reporting entity funded investments in fixed assets and are repayable mainly through subsequent budgetary appropriations from the Government.

(6) Under the *University Investments Act* (R.S.Q., c. I-17), the Government created a sinking fund in which the amounts deposited by the responsible minister are allocated exclusively to the repayment of borrowings (principal and interest) for the funding of fixed assets of university institutions in Québec.

Generations Fund
AS AT MARCH 31, 2011

The purpose of the Generations Fund, created on January 1, 2007 under the *Act to reduce the debt and establish the Generations Fund*¹, is to reduce the Government's debt. In accordance with this Act, the fund's assets are used exclusively to repay the Government's debt.

(1) The total for fixed assets included:

- fixed assets rented under capital leases totalling \$107 M in 2011, including \$22 M for equipment and \$82 M for buildings. The depreciation expense for these fixed assets was \$13 M;
- fixed assets acquired under private-public partnership agreements totalling \$1 724 M, including \$1 256 M for complex networks. The depreciation expense for these fixed assets was \$1 M;
- fixed assets in the form of property under construction, improvements or development totalling \$5 305 M, i.e. \$2 106 M for buildings, \$85 M for facilities, \$1 859 M for complex networks, \$491 M for equipment and \$764 M for the development of data processing systems. No depreciation expense is associated with these fixed assets.

(2) Financing charges of \$25 M were capitalized during the year in the cost of the fixed assets. In addition, fixed assets totalling \$73 M were acquired by donation or for a nominal fee.

Breakdown of contractual obligations (cont'd)
AS AT MARCH 31, 2011

Transfers – Agreements**Agreements between the Gouvernement du Québec and the Québec Cree**

An agreement was signed by the Government and the Québec Cree in February 2002 to help the Cree achieve autonomy and take charge of their development. The agreement also aims to more fully engage the Cree in economic development activities in the territory covered by the James Bay and Northern Québec Agreement (JBNQA).

The February 2002 agreement provides in particular for annual transfer payments to the James Bay Cree over a period of 50 years, i.e. from 2002-2003 to 2051-2052. In return, the Cree must assume the obligations of the Gouvernement du Québec, Hydro-Québec and the Société d'énergie de la Baie James under certain provisions of the JBNQA pertaining to the Cree's economic and community development. The payments to be made in the coming years, i.e. until 2052, correspond to the higher of \$70 million or that amount indexed to take into account the change in the value of hydroelectric production, mining and forest harvesting in JBNQA territory. The payment in 2011 amounted to \$82 million (\$77 million in 2010). Considering the indexation for 2012, the minimum annual payments provided for in the coming years amount to \$82 million. As at March 31, 2011, the minimum balance payable was \$3 363 million (\$3 447 million in 2010).

Another agreement was concluded in May 2007 between the Gouvernement du Québec, the Grand Council of the Crees and the Cree Regional Authority to improve the administration of justice in Cree communities and in correctional services. The minimum annual payments provided for in the coming years amount to \$15 million and they are subject to indexation until 2027. As at March 31, 2011, the minimum balance payable was \$245 million (\$250 million in 2010).

Agreement respecting global funding for the Kativik Regional Government

An agreement was signed by the Gouvernement du Québec and the Kativik Regional Government in March 2004 to simplify the terms and conditions for transfers from various Québec government departments to the Kativik Regional Government. The agreement also grants the Kativik Regional Government greater autonomy in allocating funds based on regional priorities.

The minimum annual payments provided for in the coming years amount to \$50 million and they are subject to indexation until 2028. As at March 31, 2011, the minimum balance payable was \$841 million (\$828 million in 2010).

Breakdown of contractual obligations (cont'd)
AS AT MARCH 31, 2011

Transfers – Agreements (cont'd)

Partnership agreement on economic and community development in Nunavik

A partnership agreement on economic and community development in Nunavik was signed in April 2002 between the Gouvernement du Québec, the Makivik Corporation and the Kativik Regional Government to meet the specific needs of the people of Nunavik. To that end, the Government will fund economic and community projects, thus providing local communities with better economic and community development prospects. The agreement was amended on August 1, 2006.

The minimum annual payments provided for in the coming years amount to \$30 million and they are subject to indexation until 2027. As at March 31, 2011, the minimum balance payable was \$484 million (\$489 million in 2010).

Other agreements

Other agreements include notably agreements on new fiscal and financial partnerships with the municipalities totalling \$863 million (\$1 141 million as at March 31, 2010), the national policy on rural areas totalling \$125 million (\$172 million as at March 31, 2010), the subsidy agreement reached with the Ville de Montréal totalling \$129 million (\$137 million as at March 31, 2010) and the agreement concerning block funding for northern villages in the Kativik region totalling \$231 million (\$230 million as at March 31, 2010). They also include agreements on the payment of \$581 million in interest on a loan contracted by a company in the aluminium sector (\$581 million as at March 31, 2010), the promotion and development of Montréal totalling \$141 million (\$206 million as at March 31, 2010), manpower training totalling \$210 million (\$273 million as at March 31, 2010), the promotion of a healthy lifestyle totalling \$124 million (\$140 million as at March 31, 2010), the development of young children totalling \$127 million (\$143 million as at March 31, 2010), support for informal caregivers totalling \$128 million (\$143 million as at March 31, 2010), the group health insurance plan of employees in the health and social services and education sectors totalling \$252 million and other contributions totalling \$2 957 million (\$1 453 million as at March 31, 2010).

	<u>1 306</u>	<u>1 240</u>

(1) The Société d'habitation du Québec (SHQ) grants guarantees under the *Act respecting the Société d'habitation du Québec* (R.S.Q., c. S-8).

(2) Loans from financial institutions guaranteed by the SHQ and granted to non-profit organizations or cooperatives for periods of 25 or 35 years following the approval of an extension by the SHQ. The principal and interest associated with such loans are covered by the organizations concerned. The loans finance the cost of buildings.

(3) Loans guaranteed by the Canada Mortgage and Housing Corporation (CMHC) with which the SHQ has concluded agreements under which it is committed to buying property taken over by the CMHC when a borrower defaults on a loan, for an amount equal to the value of the claim paid to the approved lender plus incidental expenses. Guarantees granted for the above-mentioned programs cover 25-year periods, except if they are related to loans granted in urban regions for NPO-Private housing programs, in which case they cover periods of 35 years. The principal and interest associated with such loans are covered by the organizations concerned. The loans finance the cost of buildings.

	<u>2 959</u>	<u>2 915</u>

(1) The Government of Québec guarantees the reimbursement of losses of principal and interest to lending institutions under the *Act respecting financial assistance for students* (R.S.Q., c. A-13.3).

Stabilization reserve

AS AT MARCH 31, 2011

(in millions of dollars)

	2011	2010
	<u> </u>	<u> </u>
Opening balance	—	433
Allocation of the balance of the recognized surplus		
Deposit in the Generations Fund		
Use of the reserve to maintain a balanced budget		(433)
	<u> </u>	<u> </u>
Closing balance	<u> </u>	<u> </u>
	<u> </u>	<u> </u>

A stabilization reserve was created under the *Balanced Budget Act*¹ to facilitate the Government's multi-year budget planning and, subsidiarily, to make it possible to pay sums into the Generations Fund.

The stabilization reserve is earmarked for maintaining a balanced budget; its balance is reduced by the amount required to attain this objective. In addition, the Government may, on the conditions it determines, use the stabilization reserve to pay sums into the Generations Fund. The balance of the reserve is reduced by the amount paid into the fund.

The sums credited annually to the stabilization reserve correspond to the amount of the surplus recognized for each fiscal year, i.e. the budget balance for the year, when it is above zero, established in accordance with the provisions of the *Balanced Budget Act*.

¹ R.S.Q., c. E-12.00001

Segment disclosures
AS AT MARCH 31, 2011

Consolidated financial statements by reporting sector

The consolidated financial statements take into account the Government's management of its resources, obligations and financial activities as a whole. Grouping these elements provides a global financial portrait of the Government. The statements include financial information from a multitude of departments, bodies, funds and enterprises. All of these entities are grouped into eight main sectors, according to their control and accountability relationship with the Government. Criteria such as ministerial accountability, legal framework, scope of authority delegated to management, funding method, degree of autonomy and nature of activities are used to classify the entities in the different sectors. The following tables present the operations and summary financial position of each of the sectors identified.

Since it was possible to associate all revenue, expenditure, asset and liability items with specific sectors, it was not necessary to use allocation methods to allocate some of the items among two or more specific sectors.

Segment disclosures (cont'd)

AS AT MARCH 31, 2011

- (1) The Consolidated Revenue Fund includes money collected or received from various sources over which Parliament has the power of appropriation, as well as the expenditures of the National Assembly, persons designated by it, departments and bodies administered by a minister whose budget is financed by appropriations allocated by the National Assembly. This sector also includes the activities of the Health Services Fund.
- (2) Government enterprises are distinct legal entities that have the power to carry out commercial activities. The sale of their goods and the delivery of their services target individuals or organizations not included in the Government's reporting entity. Therefore, these enterprises are financially autonomous in that their revenue from outside the reporting entity ensures that they carry out their activities and repay their debts on their own. Since their accounts are accounted for using the modified equity method, only their net surpluses for the fiscal year are presented in the table, after deducting the dividends paid into the Consolidated Revenue Fund.
- (3) Non-budget-funded bodies and special funds depend in whole or in part on departments for their funding. However, non-budget-funded bodies and special funds have more autonomy than those funded by budgetary appropriations. Although non-budget-funded bodies also answer to a minister, the legislation grants their management more extensive funding and operating powers. Special funds, for their part, are financial management tools that make it possible, in some situations, to administer allocated resources using a management method that is different from that applied in departments. Some funds obtain financing in whole or in part through the sale of goods or services. The results of the special funds do not include the activities of the Health Services Fund.
- (4) The health and social services network includes health and social services agencies and public health and social services institutions (hospital centres, health and social services centres, rehabilitation centres, child and youth protection centres).
The education networks are made up of the school board network, the general and vocational college (CEGEP) network and the Université du Québec and its constituent.
All of these organizations, which are funded largely through budgetary appropriations, are autonomous in regard to the delivery of public services. They are legal entities that are vested with the financial and administrative powers needed to provide public services, and they have a board of directors made up of elected or appointed local representatives from the area or sector served by each organization. In addition, the Government's ability to dispose of their assets is subject to major restrictions.
- (5) A specified purpose account is a financial management mechanism created by a Government order in council under legislative provisions. It allows a department to account in a distinct way for funds paid into the Consolidated Revenue Fund by a third party under a contract or an agreement that provides for the allocation of the funds to a specific purpose.
- (6) The Generations Fund, created on January 1, 2007 under the *Act to reduce the debt and establish the Generations Fund* (R.S.Q., c.R-2.2.0.1), differs from other funds in that it is dedicated exclusively to repaying the Government's debt.
- (7) Consolidation adjustments stem mainly from the elimination of transactions and balances between entities in the different sectors. Therefore, the revenues, expenses, assets and liabilities of each sector are presented prior to the elimination of these items. However, transactions and balances between entities within the same sector are eliminated before the segment amounts are determined.
- (8) The Québec government receives transfer revenues from the federal government encumbered by externally sourced allocations, which have to be paid to other bodies in the Government's reporting entity in accordance with contracts or agreements. These funds are collected by the Consolidated Revenue Fund and presented in the specified purpose accounts and later paid to the corresponding bodies. Consolidation adjustments are made to eliminate the federal transfer revenues transferred from the Consolidated Revenue Fund to these bodies.
- (9) This amount included \$8 295 M pursuant to orders-in-council 257-2010 and 258-2010 adopted by the Government on March 24, 2010 to cover the expenditures of organizations in the health and social services and education networks that were recorded as net debt as at April 1, 2008 following the accounting reform. Note that the extraordinary expenditures of the Consolidated Revenue Fund are fully offset by the extraordinary revenues they generate in return to organizations in the health and social services and education networks. Consequently, there is no impact on the Government's financial position and consolidated results.
- (10) The Land Transportation Network Fund was created on April 1, 2010. To make the financial data for 2009-2010 comparable with those for 2010-2011, the comparative data for the Consolidated Revenue Fund, part of whose resources were transferred to the new fund, and the comparative data for the special funds were reclassified to reflect this new structure. On March 31, 2010, the accumulated surplus that had been allocated to the new fund following the reclassification was reallocated to the Consolidated Revenue Fund since the restructuring was not yet in effect at that date.
- (11) Some of these borrowings have financed investments in fixed assets and are repayable through subsequent budgetary appropriations adopted by the Government at a later date.
- (12) Certain financial data for 2010 have been reclassified for consistency with the presentation adopted in 2011. The main items reclassified are consolidation adjustments that were taken into account in the different sectors in 2010, whereas in 2011 these items are presented in the "Consolidation adjustments" column.
